This is the emotional story of Patrick Tambay's rollercoaster Formula 1 ride with Ferrari. The saga began in 1982 with the tragedy of his friend and fellow driver Gilles Villeneuve's death in the Belgian Grand Prix at Zolder and then unfolded as Tambay took Villeneuve's place in car number 27, achieved race victories and, as the 1983 season developed, fought for the World Championship. Told in 27 chapters, this is a tale not only of Formula 1 in those colourful years but also a rare and revealing account of life inside Maranello in the twilight of the Enzo Ferrari era, supported by magnificent photographs by Paul-Henri Cahier. - British GP, 1982: at Brands Hatch Tambay's second race for Ferrari brings his first-ever podium finish, in his 51st Formula 1 start. - German GP, 1982: after team-mate Didier Pironi's career-ending crash during practice at Hockenheim, Tambay lifts his sombre Ferrari team with his first Formula 1 win. - Italian GP, 1982: in front of Ferrari's emotional home crowd at Monza, Tambay finishes second, with the great Mario Andretti, his team-mate for this one race, behind him in third place. - San Marino GP, 1983: Tambay delivers exactly what the Scuderia's fans desire - victory at Imola for the number 27 Ferrari 12 months after Gilles's last race. - South African GP, 1983: Tambay's farewell race for Ferrari sees him on pole position (his sixth front-row start in seven races), but a mechanical failure denies him any chance of a final victory.

“ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties — such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes — the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)

There was a vast difference between the BRM and any other car I'd yet driven. When I opened the throttle, even at high speeds in top gear, the whole thing shuddered with a frightening surge of power. It could spin its wheels effortlessly at speeds equal to many other cars' maximum. It was doing 187 on the straight at Monza, which was too quick for a car that didn't handle. If you let the revs drop much below 9000 the car just wouldn't go at all." Sir Stirling Moss.
