With proven pedagogy that emphasizes critical-thinking, problem-solving, and in-depth coverage, *New Perspectives* helps students develop the Microsoft Office 2013 skills they need to be successful in college and beyond. Updated with all new case-based tutorials, *New Perspectives Microsoft Office 2013* continues to engage students in applying skills to real-world situations, making concepts relevant. A new Troubleshoot case problem enhances critical thinking, and a new tutorial on Managing Your Files helps students navigate Windows 8. As always, *New Perspectives* improves learning outcomes and transference of skills by helping students understand why

what they're learning is important. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Featuring more than 600 illustrated, stand-alone tips for the Windows XP and Office 2003 user, this book reveals the effective techniques and hidden secrets which the pros use every day.

Ready to write your book? So why haven't you done it yet? If you're like most nonfiction authors, fears are holding you back. Sound familiar? Is my idea good enough? How do I structure a book? What exactly are the steps to write it? How do I stay motivated? What if I actually finish it, and it's bad? Worst of all: what if I publish it, and no one cares? How do I know if I'm even

doing the right things? The truth is, writing a book can be scary and overwhelming—but it doesn't have to be. There's a way to know you're on the right path and taking the right steps. How? By using a method that's been validated with thousands of other Authors just like you. In fact, it's the same exact process used to produce dozens of big bestsellers—including David Goggins's *Can't Hurt Me*, Tiffany Haddish's *The Last Black Unicorn*, and Joey Coleman's *Never Lose a Customer Again*. The Scribe Method is the tested and proven process that will help you navigate the entire book-writing process from start to finish—the right way. Written by 4x New York Times Best-selling Author Tucker Max and publishing expert

Zach Obront, you'll learn the step-by-step method that has helped over 1,500 authors write and publish their books. Now a Wall Street Journal Best-seller itself, *The Scribe Method* is specifically designed for business leaders, personal development gurus, entrepreneurs, and any expert in their field who has accumulated years of hard-won knowledge and wants to put it out into the world. Forget the rest of the books written by pretenders. This is the ultimate resource for anyone who wants to professionally write a great nonfiction book.

15 Minutes. That's as long as we think any student should have to spend formatting their papers. Unfortunately, students often spend hours trying to find answers from hard to follow manuals or confusing websites. Whether you want a step-by-step guide to building a title page, suggestions for writing with greater clarity, or freedom from doing internet searches every time you have a question about APA standards, *APA Made Easy* is the only blueprint that you will need for writing in APA style. This comprehensive writing guide includes illus-

trated steps for formatting an APA document in: Microsoft Word 2010, Microsoft Word 2011 for Mac, Microsoft Word 2013, and Apple's Pages programs. You will also learn how to build an APA formatted paper from the ground up by understanding:

- How to outline information you've already gathered.
- How to write an essay or research paper from an outline.
- How to write a solid introduction.
- How to use the required headings in a research paper including Abstracts, Method, Subjects and Participants, Materials or Apparatus, Results, and Discussion sections.
- Building Citations within your paper and on your Reference page. Also included in this guide:
- APA examples and high resolution screen shots to help students correctly format documents within 15 minutes.
- Over 150 completed Reference examples
- Over 60 completed In-Text Citation examples
- How to use Headings effectively in your writing
- Specific examples that cover how to cite new media such as blog posts, emails, websites, online lectures, computer programs, social media and much more.
- A new section on using and citing DOI's (Digital Object Identifiers) for new media.
- A

Short Sample paper in APA format. • For more information on *APA Made Easy* and downloadable APA templates visit: You-VersusTheWorld.com.

The record-breaking phenomenon from Elizabeth Kostova is a celebrated masterpiece that "refashioned the vampire myth into a compelling contemporary novel, a late-night page-turner" (*San Francisco Chronicle*). Breathtakingly suspenseful and beautifully written, *The Historian* is the story of a young woman plunged into a labyrinth where the secrets of her family's past connect to an inconceivable evil: the dark fifteenth-century reign of Vlad the Impaler and a time-defying pact that may have kept his awful work alive through the ages. The search for the truth becomes an adventure of monumental proportions, taking us from monasteries and dusty libraries to the capitals of Eastern Europe—in a feat of storytelling so rich, so hypnotic, so exciting that it has enthralled readers around the world. "Part thriller, part history, part romance...Kostova has a keen sense of storytelling and she has a marvelous tale to tell." —*Baltimore Sun*

Examines four novels that

feature domestic hand-crafts and how they shaped Victorian life and the Victorian novel.

A clear and concise resource, the ideal guide to Windows for IT beginners *Windows Operating System Fundamentals* covers everything you need to know about Windows 10. Learn to master the installation process and discover the cool new features of Windows 10, including Edge, Cortana, and more. And because this book follows the *Windows Server Operating System Fundamentals MTA Certification*, it is perfect for IT professionals who are new to the industry and need an entry point into IT certification. This book covers the basics of the Windows operating system, from setting up user accounts to using the start menu, running applications, and setting up internet access. You'll be prepared to upgrade a computer to Windows 10 and to master the basic tools necessary to work effectively within the OS. Each chapter closes with a quiz so you can test your knowledge before moving to the next section. Learn to configure your Windows 10 operating system, optimize account controls, configure user profiles,

customize system options, and more! Understand how to use Windows applications and tools for managing LAN settings, configuring Microsoft Edge, and setting up remote assistance Use Windows to manage devices like printers, cloud storage, OneDrive, and system devices Maintain, update, protect, and backup your data by configuring Windows Update, automated backup, and system recovery and restore With *Windows Operating System Fundamentals*, IT Professionals looking to understand more about Windows 10 will gain the knowledge to effectively use applications, navigate files and folders, and upgrade client systems. Thanks to the troubleshooting tools and tips in this book, you can apply your new skills in real-world situations and feel confident while taking the certification exam.

A plain-language guide for librarians. Overviews basic elements of desktop publishing, with information on necessary software and hardware as well as on design elements. Later sections deal with specific library applications for desktop publishing: library guides, organizational newsletters, and WWW home pages. In-

cludes planning, writing, and editing advice, as well as nuts-and-bolts information on adding graphics, HTML tags, and troubleshooting, with examples.

Shows readers how to create PDF documents that are far more powerful than simple representations of paper pages, helps them get around common PDF issues, and introduces them to tools that will allow them to manage content in PDF, navigating it and reusing it as necessary. Original. (Intermediate).

Exiled on a deserted island, a Christ-haunted journalist-turned-filmmaker attempts to persuade a married woman from his past to help him produce a science-fiction-themed pastiche to the 1960s French New Wave classic, "Last Year at Marienbad." Through this act of artistic creation, he expects to carry out the will of God by prophesizing the death of time and the birth of a new religion. If only he can make the woman remember him... "Marienbad My Love" is the world's longest novel, a multi-million-word, multiple-volume work meticulously assembled through calculation and chance from fragments of pre-ex-

isting texts both written and appropriated by Mark Leach over the course of 30 years - "the movie," as Leach calls it, "of all my labors and all my inspirations."

Searchable electronic version of print product with fully hyperlinked cross-references.

Italy, 512 CE. After the Romans before the Middle Ages, one patrician sets out to right wrongs. This digital box set contains the first four Argolicus mysteries: The Roman Heir: Argolicus begins a journey home to retire from politics. As a personal favor he delivers a book to a young scholar. But the young man's father is murdered hours before and Argolicus is tasked to find the killer among the patricians in an unfamiliar town where he knows no one. The Used Virgin: The governor holds a family friend prisoner. When Argolicus visits to investigate, he unearths a greedy plot to tarnish a good man's name. To expose the plot, he must challenge the governor's venal power to reveal a scheme. The Vellum Scribe: When Argolicus' uncle finds a dead body, it starts a chain of treacherous alliances based on greed and envy based on old friendships. But then

an ambush attack produces a clue. The Peach Widow: A simple request from his mother, sends Argolicus to settle a legal question in a family at odds. Perplexed by subterfuge and greed motivating each family member, he finds no clues until the farm dog starts to play. What readers are saying: ★★★★★ 'A story well told. A 'world' worth settling into!' ★★★★★ 'Transport you to that ancient time, so you can meet their people and see their lives.' ★★★★★ 'Absolutely wonderful.' ★★★★★ 'A rich tapestry of interactions that serve to draw the reader deeper in..' ★★★★★ 'Highlights some of the most basic of emotions: anger, possession, hurt, sympathy, loss and guilt and, of course, greed..' ★★★★★ 'No telephones, no computers, no scientific method as we understand it, no mysterious villains with international organizations - and it works. .' ★★★★★ 'If I had to put stars for this book, I have had to put 6 stars!' ★★★★★ 'A thoughtful atmospheric pierce with wonderful characters.' ★★★★★ 'For mystery lovers with a love of history.' ★★★★★ 'Packs not only a great mystery but also a lot of truly interesting information about the

era.' ★★★★★ 'A world with very different rules for dealing with murder.'

his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on

which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as 'e-wallets' and 'cloud computing'. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. **KEY FEATURES** • Provides comprehensive coverage of all basic concepts of IT from first principles • Explains acquisition, compression, storage, organization, processing and dis-semination of multimedia data • Simple explanation of mp3, jpg, and mpeg4 compression • Explains how computer networks and the Internet work and their applications • Covers business data processing, World Wide

Web, e-commerce, and IT laws • Discusses social impacts of IT and career opportunities in IT and IT enabled services • Designed for self-study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises.

This book is a printed edition of the Special Issue "Document Image Processing" that was published in J. Imaging

Incorporating the latest features of the new version of the word processing software, a condensed manual intended for beginners explains the basic tools that can be used for creating page layouts, inserting forms and tables, and including graphics.

Updated to incorporate the latest features, tools, and functions of the new version of the popular word processing software, a detailed manual explains all the basics, as well as how to create sophisticated page layouts, insert forms and tables, use graphics, and create book-length documents with outlines and Master Documents. Original. (All Users)

Now available in paperback—with a new preface and interview with Jessica Livingston about Y Combinator! Founders at Work: Stories of Startups' Early Days is a collection of interviews with founders of famous technology companies about what happened in the very earliest days. These people are celebrities now. What was it like when they were just a couple friends with an idea? Founders like Steve Wozniak (Apple), Caterina Fake (Flickr), Mitch Kapor (Lotus), Max Levchin (PayPal), and Sabeer Bhatia (Hotmail) tell you in their

own words about their surprising and often very funny discoveries as they learned how to build a company. Where did they get the ideas that made them rich? How did they convince investors to back them? What went wrong, and how did they recover? Nearly all technical people have thought of one day starting or working for a startup. For them, this book is the closest you can come to being a fly on the wall at a successful startup, to learn how it's done. But ultimately these interviews are required reading for anyone who wants to understand business, because startups are business reduced to its essence. The reason their founders become rich is that startups do what businesses do—create value—more intensively than almost any other part of the economy. How? What are the secrets that make successful startups so insanely productive? Read this book, and let the founders themselves tell you.
