4BN3G7 - MICAH REINA

As U.S. and Canadian automakers and dealers face bankruptcy and/or unprecedented downsizing, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 35 years, pulls no punches. This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal. Know all about profit margins, rebates, and safety defects. And when things go wrong, fight back! Lemon-Aid's complaint tactics, sample letters, Internet gripe sites, and winning jurisprudence will get you attention — and a refund!

A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

With over 1,000 listings of green retailers, service providers, and organisations throughout the five boroughs of New York City, this guide is an indispensable reference for eco-friendly shopping. It also offers practical advice and environmental tips that can be easily used at home. Listings range from organic restaurants and grocery stores to dry cleaners, organic pest-control services, and sustainable building suppliers, such as landscapers and interior designers. All listings are vetted by a research team and then rescreened by local expert advisers, providing shoppers with confident, reliable choices. Some listings are further recognised with a "green leaf" award, which gauges green businesses on a scale of one to four leaves, four being the greenest. This guide is a truly complete resource for green living.

"TRB's Transit Cooperative Research Program (TCRP) Synthesis 106: Energy Savings Strategies for Transit Agencies describes energy reduction strategies being used in the United States and Canada

that address vehicle technologies; vehicle operations, maintenance, and service design; non-revenue vehicles; stations and stops; building; indirect energy use; and renewable power generation."--Publication page.

Russia and the Commonwealth of Independent States deals with the twelve independent republics that became members of the Commonwealth of Independent States following the collapse of the Soviet Union in December 1992.

Rain Woodrow is an entrepreneur, both at heart and by profession. She's not afraid to do whatever it takes to make her company a success. It's a work ethic that is about to come in handy at home too. One night, she and her boyfriend, Cullen Dangsi, notice something remarkable happen. At a gathering of their neighbours, each stands up and pledges to work towards their highest aspirations and goals. There is power in numbers, they realise, and soon the neighbours are working together for both individual and community objectives. This cooperative spirit does not go unnoticed by the media, and soon the spotlight of public attention shines brightly on Sunlit Avenue. But that attention comes at a cost. It draws focus to those who aren't quite as dedicated to the communal projects, as well as those who are jealous of what others are achieving. Why can't everyone be supportive of this initiative to make each other's lives better? Rain and Cullen work to solve the mystery, so that they can achieve their dreams, with or without the naysayers. The neighbours have a decision to make:

do they allow themselves to be pulled down by toxic people—or do they work even harder to accomplish their goals with renewed ambition?

Describes the potential environmental impacts of the Proposed Final 2012-2017 Outer Continental Shelf (OCS) Oil and Gas Leasing Program (PFP), which establishes a schedule that is used as a basis for considering where and when oil and gas leasing might be appropriate over a 5-year period.

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The impor-

tant marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

This contributed volume collects insights from industry professionals, policy makers and researchers on new and profitable business models in the field of electric vehicles (EV) for the mass market. This book includes approaches that address the optimization of total cost of ownership. Moreover, it presents alternative models of ownership, financing and leasing. The editors present state-of-the-art insights from international experts, including real-world case studies. The volume has been edited in the framework of the International Energy Agency's Implementing Agreement for Cooperation on Hybrid and Electric Vehicles (IA-HEV). The target audience primarily comprises practitioners and decision makers but the book may also be beneficial for research experts and graduate students.
