The first major study to explore the relationship between clothing made for survival in the most inhospitable environments on earth and beyond, and the high fashion it has inspired Today— from haute couture to ready-to-wear— parkas, puffer coats, and backpacks, as well as garments made of neoprene and Mylar are everywhere. But the roots of these ubiquitous items of dress and cutting-edge textiles are rarely acknowledged or understood. Inspired by the so-called "heroic era" of polar navigation (1890–1922), extreme mountain climbing, deep sea exploration, and journeys to outer space, Expedition explores how garments made for the most inhospitable environments on earth and beyond have in-

spired more than sixty years of fantastical, otherworldly fashions. Lavishly illustrated, this publication features approximately 150 color photographs. The images include high fashion magazine editorials by Irving Penn, Richard Avedon, and others; museum objects from the permanent collections of The Museum at FIT and the American Museum of Natural History; and unpublished photographs of early expeditions in the archives of the Explorer's Club in New York.

In the age of adventure, when dirigibles coasted through the air and vast swaths of the Earth remained untouched and unseen by man, one pack of relentless explorers competed in the race of a lifetime: to be the first aviator to fly over the North Pole. What inspired their dangerous fascination? For some, it was the romantic theory about a "lost world," a hidden continent in the Arctic Ocean. Others were seduced by new aviation technology, which they strove to push to its ultimate limit. The story of their quest is breathtaking and inspiring; the heroes are still a matter of debate. It was the 1920s. The main players in this high stakes game were Richard Byrd, a dashing Navy officer and early aviation pioneer; and Roald Amundsen, a Viking in the sky, bitter rival of Byrd's and a hardened veteran of polar expeditions. Each man was determined to be the first aviator to fly over the North Pole, despite brutal weather conditions, financial disasters, world wars, and their own personal demons. Byrd and Amundsen's epic struggle for air primacy ended in a Homeric episode, in which one man had to fly to the rescue of his downed nemesis, and left behind an enduring mystery: who was the first man to fly over the North Pole? Race to the Top of the World: Richard Byrd and the First Flight to the North Pole is a fast-paced, larger-than-life adventure story from Sheldon Bart, the only historian with unprecedented access to Richard Byrd's personal archives. With powerful, never-before-seen evidence of the race to pioneer one of Earth's last true frontiers, Race to the Top of the World is a story of a day when men were heroes and the wild was untamed.
