2ZPLJ2 - YADIRA HOLDEN

Years after the U.S. invasion of Iraq, a loosely organized insurgency continues to target American and Coalition soldiers, as well as Iraqi security forces and civilians, with devastating results. In this sobering account of the ongoing violence, Ahmed Hashim, a specialist on Middle Eastern strategic issues and on irregular warfare, reveals the insurgents behind the widespread revolt, their motives, and their tactics. The insurgency, he shows, is not a united movement directed by a leadership with a single ideological vision. Instead, it involves former regime loyalists, Iraqis resentful of foreign occupation, foreign and domestic Islamist extremists, and elements of organized crime. These

groups have cooperated with one another in the past and coordinated their attacks; but the alliance between nationalist Iraqi insurgents on the one hand and religious extremists has frayed considerably. The U.S.-led offensive to retake Fallujah in November 2004 and the success of the elections for the Iraqi National Assembly in January 2005 have led more "mainstream" insurgent groups to begin thinking of reinforcing the political arm of their opposition movement and to seek political guarantees for the Sunni Arab community in the new Iraq. Hashim begins by placing the Iraqi revolt in its historical context. He next profiles the various insurgent groups, detailing their origins, aims, and operational and tactical *modi operandi*. He concludes with an unusually

candid assessment of the successes and failures of the Coalition's counter-insurgency campaign. Looking ahead, Hashim warns that ethnic and sectarian groups may soon be pitted against one another in what will be a fiercely contested fight over who gets what in the new Iraq. Evidence that such a conflict is already developing does not augur well for Iraq's future stability. Both Iraq and the United States must work hard to ensure that slow but steady success over the insurgency is not overshadowed by growing ethno-sectarian animosities as various groups fight one another for the biggest slice of the political and economic pie. In place of sensational headlines, official triumphalism, and hand-wringing, *Insurgency and Counter-Insurgency in Iraq* offers a clear-eyed analy-

sis of the increasingly complex violence that threatens the very future of Iraq.

This essay collection proposes that G.W.M. Reynolds's contribution to Victorian print culture re-

veals the interrelations between authorship, genre, and radicalism in popular print culture of the nineteenth century. As a best-selling author of popular fiction marketed to the lower classes, and a passionate champion of radical politics and "the industrious classes," Reynolds and his work demonstrate the relevance of Victorian Studies to topics of pressing contemporary concern including populism, working-class fiction, the concept of 'originality', and the collective scholarly endeavour to 'widen' and 'undiscipline' Victorian Studies. Bringing together well-known and newly-emerging scholars from across different disciplinary perspectives, the volume explores the importance of Reynolds Studies to scholarship on the nineteenth-century. This book will appeal to students and scholars of the nineteenth-century press, popular culture, and of authorship, as well as to Victorian Studies scholars interested in the translation of Victorian texts into new and indigenous markets. This annual volume from the Worldwatch Institute gives prominence to key trends that often escape the attention of the news media, world leaders and economic experts. The

book distils 36 vital signs of our times from thousands of governmental, industrial and scientific sources, allowing readers to track key indicators that show our social, economic and environmental progress, or lack of it. Each trend is presented in both text and graphics, providing a thorough overview.

This report considers the roles of a variety of different agents for accountability in the English school system. The first part examines self-evaluation, self-improvement partners and local authorities. Schools have increasingly been encouraged to formalise the self-evaluation process as part of their improvement strategy. They are assisted in their self-evaluation and improvement processes by School Improvement Partners (SIPs) who are appointed by the local authority. School provision is commissioned by local authorities, who also have a remit to monitor local schools' performance. The report then focuses on the work of Ofsted. School inspection reports are a major source of information about a school's performance, and inspection is often the trigger for a school to address its performance issues. The report then looks at the Achievement and Attain-

ment Tables, formerly known as performance tables. The tables have been the subject of controversy for many years because, although they do not actually rank schools according to their performance in national examinations, they permit others, especially the media, to do so. Critics argue that they give only a partial view of a school's overall performance, and the proposed School Report Card is an attempt to address this issue by providing more information on a wider range of performance indicators. The school accountability process has become very complex with new programmes and policies emerging piecemeal from central government. There are concerns about the consistency of approach in such a complex system. And are schools really free to drive their own improvement given that they are still subject to programmes devised and applied by central government?

In this first detailed and comprehensive account of Leopardi's theory of poetry, G. Singh assesses both the literary and critical attainments of a poet whose eminence ranks him with Dante and Petrarch. Singh's analysis, which employs extensive reference to Leopardi's work in order to illustrate the author's own comments, sets forth Leopardi's views on the larger questions of tradition, inspiration, and the imagination in poetry. Later chapters are concerned with the more specific matters of the poetic image, style, and language.

Anthropocene Theater and the Shakespearean

Stage revises the anthropocentric narrative of early globalization from the perspective of the non-human world in order to demonstrate Nature's agency in determining ecological, economic, and colonial outcomes. It welcomes readers to reimagine theater history in broader terms, and to account for more non-human and atmospheric players in the otherwise anthropocentric history of Shakespearean performance. This book analyses plays, horticultural manuals, cosmetic recipes, Puritan polemics, and travel writing in order to demonstrate how the material practices of the stage both catalyze and resist early forms of globalization in an ecological arena. William Steffen addresses the role of an understudied ecological performance history in determining Shakespeare's iconic cultural status, and models how non-human players have undermined Shakespeare's authoritative role in colonial discourse. Finally, this book makes a celebratory argument for the humanities in the age of climate change, and invites interdisciplinary engagement a research community that is compelled to find strategies for cultivating a hope-

ful tomorrow amidst unprecedented anthropogenic environmental changes.

Following on from the first volume, this book details the engrossing story of the two camera operators sent out to the Balkans by the American film producer Charles Urban, who had established his company in London in the early 20th century. The first of them, the Englishman Charles Rider Noble, filmed as many as 38 short living pictures in Bulgaria in 1903 and 1904. The second, the Scot John Mackenzie, travelled with his bioscope through Croatia, Montenegro, Bosnia and Herzegovina, Serbia, Bulgaria and Romania in 1905. Thus, thanks to the two Britons, the first sequences of films depicting the landscapes, historical and archaeological monuments, architectural landmarks, cultural traditions and ethnographic features of the region, as well as some of its public events of the time, were shown in the peninsula. This book provides an exciting trip 'through savage Europe', tracing the amazing adventures of its 'main characters' and their life paths to their very end. Therefore, it makes absorbing reading, while preserving its status as a unique sci-

entific work, intended for film historians, early cinema researchers, film and television archives experts, college and university lecturers, students and schoolchildren. It will be of interest to everyone who, regardless of their age, loves the 'Seventh Art' and adores the secrets its early history still holds.

No. 3 of each year (1979-) has distinctive title: America and the world. The Messages of its Walls and Fields seeks to understand the culture of each decade of the School's development. The focus is on the boys themselves, but Katharine Thornton also evaluates the policies of succeeding Councils of Governors and the achievements of the thirteen Headmasters who have led Saints from 1847 to 2009. The curriculum story is here, the context for advocating sport, the emergence of the external activities of the co-curriculum, the values of a Saints' education, the background to each building project, the economy of the School, drama and the arts, science and new laboratories, the ambience of stone, trees and green lawn at the heart of a Saints' experience. St Peter's College graduates

have made significant contributions to the life of South Australia, in the professions, in social values, in politics, in sport and in the arts. The history of South Australia must include a knowledge of this School. Here it is in twenty chapters and hundreds of illustrations, not just an entertainment for a week but a reliable record for a lifetime.

By the end of the twentieth century, Freemasonry had acquired an unsavoury reputation as a secretive network of wealthy men looking out for each others' interests. The popular view is of an organisation that, if not actually corrupt, is certainly viewed with deep mistrust by the press and wider society. Yet, as this book makes clear, this view contrasts sharply with the situation at the beginning of the century when the public's perception of Freemasonry in Britain was much more benevolent, with numerous establishment figures (including monarchs, government ministers, archbishops and civic worthies) enthusiastically recommending Freemasonry as the key to model citizenship. Focusing particularly on the role of the press, this book investigates the

transformation of the image of Freemasonry in Britain from respectability to suspicion. It describes how the media projected a positive message of the organisation for almost forty years, based on a mass of news emanating from the organisation itself, before a change in public regard occurred during the later twentieth-century. This change in the public mood, the book argues, was due primarily to Masonic withdrawal from the public sphere and a disengagement with the press. Through an examination of the subject of Freemasonry and the British press, a number of related social trends are addressed, including the decline of deference, the erosion of privacy, greater competition in the media, the emergence of more aggressive and investigative journalism, the consequences of media isolation and the rise of professional Public Relations. The book also illuminates the organisation's collisions with nationalism, communism, and state welfare provision. As such, the study is illuminating not only for students of Freemasonry, but those with an interest in the wider social history of modern Britain.
