Most food is purchased with the consumers' own money, but a significant amount is purchased by low-income individuals using food stamps. Why can't education be provided similarly using education stamps? We trust for-profit enterprises to provide our food. Why can't we trust for-profit enterprises to provide K-12 education? This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. *Advanced Problems in Mathematics* is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

In Canada many public projects, programs, and services perform well, and many are very successful. However, these cases are consistently underexposed and understudied in the policy literature which, for various reasons, tends to focus on policy mistakes and learning from failures rather than successes. In fact, studies of public policy successes are rare not just in Canada, but the world over, although this has started to change (McConnell, 2010, 2017; Compton & 't Hart, 2019; Luetjens, Mintrom & 't Hart, 2019). Like those publications, the aims of *Policy Success in Canada* are to see, describe, acknowledge, and promote learning from past and present instances of highly effective and highly valued public policymaking. This exercise will be done through detailed examination of selected case studies of policy success in different eras, governments, and policy domains in Canada. This book project is embedded in a broader project led by 't Hart and OUP exploring policy successes globally and regionally. It is envisaged as a companion volume to OUP's 2019 offering *Great Policy Successes* (Compton and 't Hart, 2019) and to *Successful Public Policy in the Nordic Countries* (de La Porte et al, 2022). This present volume provides an opportunity to analyze what is similar and distinctive about introducing and implementing successful public policy in one of the world's most politically decentralized and regionally diverse federation and oldest democratic polities.

The lives of professors and students, deans and presidents, their ideas and idiosyncrasies, their triumphs and failures, provide the driving force of Waite's narrative. Avoiding the details of financing, curriculum, and administration that sometimes dominate institutional histories, Waite focuses on the men and women who were the blood of the university and who established its traditions and ethos. Halifax in peace and war is basic to Dalhousie's history, as is its relations with other colleges and universities in Nova Scotia. Waite sets all this out, placing Dalhousie's development within the larger Nova Scotian context.
