YDFUTF - BRAEDON JOHNS

A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins *The Dream House*, Craig Higginson's riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to *The Dream House*, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

Agribusiness: Fundamentals and Applications, second edition, discusses the broad spectrum of the agribusiness world. Several chapters focus on the agricultural input sector, which are the supplies and services needed by ranchers, farmers, and other production agriculturists. Some examples include the feed, seed, fertilizer, chemical, and farm machinery agribusinesses. Once basic production economics and farm management are discussed, several more chapters cover the agribusiness output sectors that include agribusinesses, which move food and fiber from the farms and ranches to the consumer. The fundamentals and applications of agribusiness are detailed showing how products go from their source to the consumer highlighting the many steps in this process. Basic principles of commodity marketing, international agriculture marketing and food and fiber processing channels are some of the topics explored in detail. Basic agricultural economic principles are discussed to assist the user to better manage an agribusiness. This book not only discusses employment opportunities, but also explains how to start-up, run and manage your own agribusiness. - Publisher.

Alternative assets such as fine art, wine, or diamonds have become popular investment vehicles in the aftermath of the global financial crisis. Correlation with classical financial markets is typically low, such that diversification benefits arise for portfolio allo-

cation and risk management. Cryptocurrencies share many alternative asset features, but are hampered by high volatility, sluggish commercial acceptance, and regulatory uncertainties. This collection of papers addresses alternative assets and cryptocurrencies from economic, financial, statistical, and technical points of view. It gives an overview of their current state and explores their properties and prospects using innovative approaches and methodologies.

This book gathers selected peer-reviewed papers presented at the Second International Conference on Infectious Diseases and Nanomedicine (ICIDN), held in Kathmandu, Nepal on December 15-18, 2015. It also includes invited papers from the leading experts in the related fields. The book highlights the importance of "Interdisciplinary Collaborative Research for Innovation in the Biomedical Sciences," the motto of the ICIDN conference. In particular, it addresses interdisciplinary scientific approaches for systematic understanding of the biology of major human infectious diseases and their treatment regimes by applying the tools and techniques of nanotechnology. It also provides cutting-edge information on infectious diseases and nanomedicine, focusing on various aspects of emerging infectious diseases: cellular and molecular microbiology; epidemiology and infectious disease surveillance; antimicrobials, vaccines and alternatives; drug design, drug delivery and tissue engineering; nanomaterials and biomedical materials.

The book studies the trends that led to the worst financial crisis since the Great Depression, as well as the unfolding of the crisis, in order to provide policy recommendations to improve financial stability. The book starts with changes in monetary policy and income distribution from the 1970s. These changes profoundly modified the foundations of economic growth in the US by destroying the commitment banking model and by decreasing the earning power of households whose consumption has been at the core of the growth process. The main themes of the book are the changes in the financial structure and income distribution, the col-

lapse of the Ponzi process in 2007, and actual and prospective policy responses. The objective is to show that Minsky's approach can be used to understand the making and unfolding of the crisis and to draw some policy implications to improve financial stability.

The Privateersman, written in 1846, was the last of Frederick Marryat's nautically oriented novels, although one of his best non-nautical works, Children of the New Forest, still lay ahead of him. Privateers were essentially legalized pirates. They functioned like the illegal variety; but they carried a document from their government authorizing them to prey on the merchant ships of a specific enemy country. This document is what kept them from being hung as pirates should they be caught. After capturing a ship, they would bring it into an approved port where the ship's goods, along with the ship itself, would be sold. The government got a cut, the ship's officers and crew got a cut, and the investors got a return on their money which allowed them to send the privateer out again. The Privateersman is set in the early 1700s and gives us a keen insight into the world of privateering. Combine that insight with nonstop action and Marryat's unique dry wit, and you have a tremendously entertaining read.

We scrutinize two strands of received wisdom about debt crises: that which draws a strong contrast between the 1930s and 1980s in extent of default and ease of settlement, and that which attributes the difference to greater government involvement today. Rather than a sharp, dichotomous variable, default in the 1930s was often partial and intermittent. Neither was settlement achieved in a way that readily permitted countries to put the debt crisis behind them. And creditor-country governments were often intimately involved in the process of debt negotiation. We consider a number of additional factors influencing the ease of settlement: (i) institutional features of the lending process; (ii) institutional features of the settlement process; (iii) the role of national divisions within the creditor community; (iv) the influence of global commodity- and credit-market conditions over the process of settlement.

'It can be seen from the foregoing that this book constitutes a wide-ranging selection of good quality and interesting papers on a topic area of ongoing concern. . . Peter Moizer's introduction is succinct, cogent and provides a compelling structure within which to consider the papers. A further particularly nice feature of the selection is, that by often including two papers in a specific area, the manner in which extensions of ideas and refinements in method are highlighted, and thus the reader is given a flavour of how papers in a given area have developed: one gains a sense of living literatures. . . readers are unlikely to be disappointed. . . this volume constitutes a nicely judged and good selection of papers in the area of governance and auditing that is a useful addition to the shelves of anyone with an interest in this area.' - Pelham Gore, *European Accounting Review* This authoritative new collection contains reprints of seminal articles on the subject of auditing and its relationship to the way in which outside stakeholders monitor the activities of corporate management. Whilst the primary audience is students in upper-level undergraduate and graduate accounting courses, the book should also be of use to existing researchers, as it collects together the 'must read' articles on the subject in a readily accessible form.
