Originally published in 1991. The transplantation of thousands of Indian workers to South Africa under indenture between 1860 and 1911 was a political act with far-reaching consequences for their linguistic traditions. In this book, the history of one of these Indic languages, Bhojpuri, and its adaptations to its new context are traced to the point where a distinct South African Bhojpuri koine (generally known as Hindi) came into being. The roots and subsequent evolution of this language variety, as well as the events contributing to its demise, form the basis of this study. Current patterns of usage by different generations are documented in the form of traditional folk tales, proverbs, riddles and songs, alongside personal interviews. This study offers a partial history of Bhojpuri speakers, who have been otherwise largely silent in the history of colonial Natal.

This essential guide helps teachers refine their approach to fundamental challenges in the classroom. Based on research from cognitive science and formative assessment, it ensures teachers can offer all students the support and challenge they need - and can do so sustainably. Written by an experienced teacher and teacher educator, the book balances evidence-informed principles and practical suggestions. It contains: A detailed exploration of six core problems that all teachers face in planning lessons, assessing learning and responding to students Effective practical strategies to address each of these problems across a range of subjects Useful examples of each strategy in practice and accounts from teachers already using these approaches Checklists to apply each principle successfully and advice tailored to teachers with specific responsibilities. This innovative book is a valuable resource for new and experienced teachers alike who wish to become more responsive teachers. It offers the evidence, practical strategies and

supportive advice needed to make sustainable, worthwhile changes.

A sweet tale of friendship and learning to help one another, set in the beautiful countryside Isaac is a hedgehog who has only ever been alone - and that is the way he likes it. One day an apple falls from a tree and sticks onto the spines on his back. He wiggles and jiggles, but he cannot get it off. As he struggles to remove the apple, help comes in the unexpected form of a donkey who cannot reach the apples which fall outside of his paddock. Isaac learns that it is better to have a friend and to be helpful than to be on your own all of the time.

For the purposes of this volume, originally published in 1954, two southern zones of Bantu have been included - south of the Zambezi and east of the Kalahari. The book discusses the phonetic and morphological characteristics of these 2 zones and a classification of the groups, clusters and dialects is provided. For comparative purposes detailed information on some striking dialectical forms is given in the appendices.

In various African countries, governments are forced to accept and/or establish decentral structures in order to facilitate ways in which the poor sections of their population might gain influence on and access to development resources. Yet, there is confusion about the role and functioning of such decentral structures as well as about sustainable political approaches to the top down transfer of government power in the context of local agendas. The book highlights major aspects of the legitimacy of local power as presented by modern self-government structures as well as traditional communal authorities. Although the main focus is placed on Southern Africa (Namibia, South Africa, Botswana), examples from other regions (Ghana, Democratic Republic of the Congo) are also put into perspective. This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

As the elderly population increases, the importance of creating sophisticated information support to humans with limited sensing performance has also grown. This book discusses human and artificial sensing in conjunction with human perception capabilities

(auditory, taste, smell, vision, and touch). It also discusses the fusion of this sensing information to find answers to questions such as how we can increase our human "fuzzy" decision capability (perception). The book presents intelligent new technologies that can enhance the natural sensing, perception, and mobility abilities of humans, allowing them to have healthier, more productive, safer lives.

Demonstrating how users of law, who often operate in multi-sited situations, are forced to deal with increasingly complex legal circumstances, this volume focuses on political and social processes through which people appropriate, use and create legal forms in multiple legal settings. It provides new insights into social and political processes through which transnational law is locally appropriated by different actors and presents empirical studies of confrontation, adaptation, vernacularization and hybridization of law due to its transplantation across the borders of national states. The contributors offer insights into modern dynamics of legal change, challenging assumptions about increasing homogeneity in law, with a keen eye for the historical situations in which current legal changes stand.

Verse-by-verse commentary on the Book of Job

Translating for Children is not a book on translations of children's literature, but a book on translating for children. It concentrates on human action in translation and focuses on the translator, the translation process, and translating for children, in particular. Translators bring to the translation their cultural heritage, their reading experience, and in the case of children's books, their image of childhood and their own child image. In so doing, they enter into a dialogic relationship that ultimately involves readers, the author, the illustrator, the translator, and the publisher. What makes Translating for Children unique is the special attention it pays to issues like the illustrations of stories, the performance (like reading aloud) of the books in translation, and the problem of adaptation. It demonstrates how translation and its context takes precedence can take over efforts to discover and reproduce the original author's intentions. Rather than the authority of the author, the book concentrates on the intentions of the readers of a book in translation, both the translator and the target-language readers.

GOOD MORNING AMERICA BUZZ PICK • The Pulitzer Prize-winning playwright and co-writer of *In the Heights* tells her lyrical story of coming of age against the backdrop of an ailing Philadelphia barrio, with her sprawling Puerto Rican family as a collective muse. LONGLISTED FOR THE ANDREW CARNEGIE MEDAL • ONE OF THE BEST BOOKS OF THE YEAR: NPR, New York Public Library, BookPage, and BookRiot • "Quiara Alegría Hudes is in her own league. Her sentences will take your breath away. How lucky we are to have her telling our stories."—Lin-Manuel Miranda, award-winning creator of *Hamilton* and *In the Heights* Quiara Alegría Hudes was the sharp-eyed girl on the stairs while her family danced their defiance in a tight North Philly kitchen. She was awed by her mother and aunts and cousins, but haunted by the unspoken, un-

told stories of the barrio—even as she tried to find her own voice in the sea of language around her, written and spoken, English and Spanish, bodies and books, Western art and sacred altars. Her family became her private pantheon, a gathering circle of powerful orisha-like women with tragic real-world wounds, and she vowed to tell their stories—but first she'd have to get off the stairs and join the dance. She'd have to find her language. Weaving together Hudes's love of music with the songs of her family, the lessons of North Philly with those of Yale, this is a multitythmic dive into home, memory, and belonging—narrated by an obsessed girl who fought to become an artist so she could capture the world she loved in all its wild and delicate beauty.

This novel is the first of many works of literature that takes the great Zulu leader, king, and emperor as its subject.

A one-way ticket to Australia...two months of travel...and a shoestring budget. In *Red Earth Diaries* we meet Jason and Ambika, a newlywed couple who migrated to Australia with the hope of a fresh start. However, unlike most migrants, they made a bold decision to postpone their settlement plans, throw caution to the wind and backpack in Australia on a shoestring budget. Their intention was to learn about the country and its people first-hand? a land they would someday call home. Swimming with sharks, cuddling cute koalas, chartering private helicopters, venturing deep into ancient rainforests, and getting to know plenty of locals - the couple had incredible experiences in this stunning country. Their travel story is interwoven with snippets of history and provides the reader with a glimpse of Australia as viewed through the eyes of new migrants. Join Jason and Ambika on their spectacular journey of discovery. *Red Earth Diaries* is founded on four primary pillars: a migrant's journal, a travelogue, a delve into Australian history, and an inspirational tale. The central message of the book is for everyone to chase their dreams - however distant they may seem. The central message of the book is for everyone to chase their dreams - however distant and impossible they may seem. Moving to Australia has been one seemingly impossible goal the author had set decades ago, and he likewise urges the reader to shed all reservations and to dream the wildest dreams possible. The Preface of *Red Earth Diaries* is called *Dreamtime*, and in it, the author describes the evolution of his journey to this strange and peculiar wonderland. As a travelogue, the book harkens to all travellers as well as migrants who are already in Australia or who

are thinking of making the move to this beautiful country. Some key historical events described: The Endeavour striking the reef, finding a passage through the Blue Mountains, the gold rush, the birth of Canberra, WWI and WWII, Early colonization, construction of Opera House. First published in 1988, this book is concerned with the definite and indefinite articles in English. It provides an integrated pragmatic-semantic theory of definite and indefinite reference, on the basis of which, many co-occurrence restrictions between articles and non-modifiers are explained. At the general theoretical level, this book looks at the role of semantics in the prediction of all and only the grammatical sentences of a language. A generalisation is proposed uniting semantic oppositions underlying ungrammaticality with syntactic oppositions between conditions of application on transformational generative rules. A procedure is suggested for distinguishing semantic from syntactic causes of ungrammaticality. At a more particular level, the book explores the nature of reference. It examines an important selection of subjects such as the contrast between definiteness and indefiniteness, the relationship between definite and demonstrative reference, and the relationship between pragmatic and logical aspects of determining meaning.

An updated edition of the classic history of schizophrenia in America, which gives voice to generations of patients who suffered through "cures" that only deepened their suffering and impaired their hope of recovery. Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In *Mad in America*, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's most damning revelation, *Mad in America* examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsy-

chotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book -- updated with a new introduction and prologue bringing in the latest medical treatments and trends -- *Mad in America* raises important questions about our obligations to the mad, the meaning of "insanity," and what we value most about the human mind.

The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives. We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.
