Too often attacked as hopelessly abstract, contemporary critical social theory can help us to understand both public policy and its analysis. In this book, John Forester shows how policy analysis, planning, and public administration are thoroughly political communicative practices that subtly and selectively organize public attention. Drawing from Jürgen Habermas's critical communications theory of society, Forester shows how policy developments alter the social infrastructure of society. He provides a clear introduction to critical social theory at the same time that he clarifies the practical and political challenges facing public policy analysts, public managers, and planners working in many fields.

This practical K-12 teacher resource explains the "whats," "whys," and "how-tos" of using Questioning the Author (QtA), a powerful approach for enhancing reading

comprehension and engagement. Thorough yet concise, the book shows how to plan lessons using both narrative and expository texts, formulate open-ended Queries, and guide class discussions around them. The authors discuss how QtA

has evolved over many years of classroom application and include innovative ideas for integrating vocabulary instruction and writing prompts into QtA lessons. Also provided are steps for gradually transitioning

from teacher-led instruction to independent reading. The book features extended examples of teachers implementing QtA, as well as four complete texts that can be downloaded and printed for classroom use.
