This book bridges the gap between sophomore and advanced / graduate level organic chemistry courses, providing students with a necessary background to begin research in either an industry or academic environment. • Covers key concepts that include retrosynthesis, conformational analysis, and functional group transformations as well as presents the latest developments in organometallic chemistry and C-C bond formation • Uses a concise and easy-to-read style, with many illustrated examples • Updates material, examples, and references from the first edition • Adds coverage of organocatalysts and organometallic reagents

Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

A comprehensive guide to building, managing, and securing scalable and reliable database and data warehousing applications using Postgres 12 and 13 Key Features Set up your database cluster and monitor, secure, and fine-tune it for optimal performance Learn the fundamentals of database management and implement client- and server-side programming using SQL and PL/pgSQL Explore useful tips to develop efficient PostgreSQL database solutions from scratch Book Description PostgreSQL is one of the fastest-growing open source object-relational database management systems (DBMS) in the world. As well as being easy to use, it's scalable and highly efficient. In this book, you'll explore PostgreSQL 12 and 13 and learn how to build database solutions using it. Complete with hands-on tutorials, this guide will teach you how to achieve the right database design required for a reliable environment. You'll learn how to install and configure a PostgreSQL server and even manage users and connections. The book then progresses to key concepts of relational databases, before taking you through the Data Definition Language (DDL) and commonly used DDL commands. To build on your skills, you'll understand how to interact with the live cluster, create database objects, and use tools to connect to the live cluster. You'll then get to grips with creating tables, building indexes, and designing your database schema. Later, you'll explore the Data Manipulation Language (DML) and server-side programming capabilities of PostgreSQL using PL/pgSQL, before learning how to monitor, test, and troubleshoot your database application to ensure high-performance and reliability. By the end of this book, you'll be well-versed with the Postgres database and be able to set up your own PostgreSQL instance and use it to build robust solutions. What you will learn Understand how users and connections are managed by running a PostgreSQL instance Interact with transaction boundaries using server-side programming Identify bottlenecks to maintain your database efficiently Create and manage extensions to add new functionalities to your cluster Choose the best index type for each situation Use online tools to set up a memory configuration that will suit most databases Explore how Postgres can be used in multi-instance environments to provide high-availability, redundancy, and scalability Who this book is for This Postgres book is for anyone interested in learning about the PostgreSQL database from scratch. Anyone looking to build robust data warehousing applications and scale the database for high-availability and performance using the latest features of PostgreSQL will also find this book useful. Although prior knowledge of PostgreSQL is not required, familiarity with databases is expected. This year marks the 50th anniversary of the British cult classic movie The Italian Job. This landmark

anniversary presents a unique opportunity to celebrate the film with a coffee table book packed full of images, insights and revelations. Loaded with Sixties swagger, and famed for its endlessly quotable dialogue and one of the most impressive car chases in movie history, The Italian Job is the ultimate celebration of 'cool Britannia'. From the opening sequence of Rossano Brazzi gliding through the Alps in an orange Lamborghini Miura, to the high-speed getaway across the city of Turin in three Mini Coopers, The Italian Job is a petrolhead's dream. The Self Preservation Society will detail how all these cars, including the Aston Martin DB4 and E-Type Jaguars were found and ultimately where they are today. Over the last 20 years, author Matthew Field has interviewed all the key people involved in the 1969 production. Through him, their stories are revealed, often for the first time. Based on more than 50 in-depth interviews with the cast and crew, and lavishly illustrated with hundreds of never-before-seen photographs and production documents, this definitive book will explode some myths, include a few revelations and tell the fascinating full story of this perennially popular movie.

The only book on the Lamborghini Miura published in the past 26 years - and enthusiasts agree it is long overdue. Written by a world-renowned authority on the subject, and featuring among other things a never-before-published factory chassis production register, technical illustrations, studio supplied images and exclusive interviews with the cars designers, this is essential reading for any Lamborghini fan.

Now thoroughly streamlined and revised, PRINCIPLES OF INFORMATION SYSTEMS, Ninth Edition, retains the overall vision and framework that made the previous editions so popular while eliminating outdated topics and updating information, examples, and case studies. In just 600 pages, accomplished authors Ralph Stair and George Reynolds cover IS principles and their real-world applications using timely, current business examples and hands-on activities. Regardless of their majors, students can use this book to understand and practice IS principles so they can function more effectively as workers, managers, decision makers, and organizational leaders. This eye-catching book tells the story of World Championship motorcycle racing with particular emphasis on the past 25 years and the role of Dorna, the international sports management and marketing group. Spain-based Dorna became involved in motorcycle racing in 1992 and set about stabilising the ailing World Championship, which had run since 1949, and introducing a new era of direction and harmony, and of sporting and commercial success. The effect of Dorna's efforts is abundantly apparent in the present-day stature of MotoGP throughout the world. In this book the world's best motorcycle-racing authors tell the entire story - of the racing itself and the Dorna backdrop to it - of those 25 years in a lively style that will appeal not only to those involved professionally in the sport but also its millions of fans world-wide. * The Dorna story, written by Dennis Noyes, is a remarkable behind-the-scenes insight, especially into those early days embracing the FIM (Federation Internationale de Motocyclisme), IRTA (International Road Racing Teams Association) and MSMA (Motorcycle Sport Manufacturers Association). The stories of the battles, the money and the involvement of Bernie Ecclestone are brilliantly divulged by the key players.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

This is the authorized biography of one of the best-liked bad boys in British motorsport. John Chatham, driver, racer, repairer, rebuilder, tuner, trader and lover of Austin-Healeys, was in the words of Geoffrey Healey "uncontrollable" in his youth, and has only mildly mellowed with age. Burly and genial but formidably competitive, and not above bending the rules when he thought he could get away with it, to many he is the archetypal club racer. John is so synonymous with Austin-Healeys that the most famous racing Healey in the world, DD300, is so well-known mainly be-

cause John campaigned it for decades, notching up tens of thousands of racing miles. But his career embraces far more than one car, and until this biography no-one had attempted to fill in the gaps. The book is not a dry description of one club race after another. It does include a list of John's principal sporting achievements, but no complete record exists of the hundreds of events which made up his competitive career, so the writer has not attempted to compile one. Instead Norman Burr, who was himself acquainted with John in his youth, has created a more rounded and personal account, full of motoring and sporting anecdotes, but also telling the story of John's family, his work, his business, his three wives and his lovers. John has a comprehensive photo library from which the book is generously illustrated, with cartoons added to illustrate some of the moments that a camera was not around to record. Thoroughly politically incorrect even by the standards of the 1960s, it's an account which will strike a chord not only with admirers of Big Healeys, but also with anyone who believes that independent thinking, and the courage to apply and enjoy it, is the greatest virtue of all.

This book covers recent advances in the use of electrostimulation therapies in movement disorders, epilepsy, inflammatory bowel disease, memory and cognition, disorders of consciousness, foot drop, dysphagia, brain injury, headache, heart failure, hearing loss, and rheumatoid arthritis. It describes techniques such as vagus nerve stimulation, deep brain stimulation, and electrical stimulation of the pharyngeal nerve. Electroceuticals: Advances in Electrostimulation Therapies is aimed at clinicians and basic researchers in the fields of neurology, neurosurgery, cardiology and rheumatology.

Out of print for twenty years, a new edition of Jim Clark 'Tribute to a Champion' by Eric Dymock will be published in the spring. Lightly edited and completely redesigned in colour throughout, this eagerly sought classic of motor racing celebrates the life and achievements of Jim Clark (1936-1968), World Champion 1963 and 1965. In the new book, Eric Dymock details his place in motor racing history and total command of Formula 1, portraying him as an individual, nail-biting and insecure, yet the greatest driver in any sort of motor sport. From a Scottish farming family Clark rewrote the annals of American racing at Indianapolis, coming second at his first attempt in 1963, winning in 1965. He seemed a match for any odds during eight dangerous years at the top of motor racing, yet died in an unlikely accident at a minor event at Hockenheim on April 7th 1968. Genius at the

wheel was not enough. Rivals' subsequent safety campaigns saved countless lives on and off the track. Eric Dymock observed Clark from before he ever sat in a racing car, covering his professional career as member of *The Motor* magazine staff from 1962, and then as specialist motor racing correspondent from 1966. This book has photographs of Jim Clark's birthplace, home, memorabilia and archive material from the Jim Clark Room at Duns. The measured analysis throws light on the tense mood of Formula 1 in the hazardous 1960s when Clark narrowly missed four consecutive world titles. Misfortune in the closing laps of the final race of the season twice denied him a unique quartet. Some of his other records remain secure however. Clark's eight "grand slams" (pole position, leading every lap, fastest lap and winning a Grand Prix - his closest rivals Alberto Ascari and Michael Schumacher managed only five) is unlikely to be matched. The new edition will go on sale in the spring at regular bookshop prices for a new generation of Formula 1 fans, as the 50th anniversary of Clark's accident approaches.

When one thinks of the Mille Miglia, the most celebrated race in the world that took place between 1927 and 1957, the mind certainly goes back to OM, Bugatti, Mercedes-Benz, Porsche, Lancia as well, of course, as the ultra-victorious Alfa Romeo and Ferrari, the greatest car manufacturers that have competed in the Italian marathon. But the memorable history of the great race is made up mainly of men: drivers, co-drivers, mechanics, technical and sports directors, organisers as well as film and show business personalities plus, naturally, an immense public following. All of those faces have names, some well-known others less so, and stories, some well worth telling others less so. The book brings together a series of portraits in alphabetical order that make up the fragments of this historic sports and cultural mosaic that was the Mille Miglia, once again told by Leonardo Acerbi from his deep knowledge of the Brescia-based race.

A lavishly illustrated volume that views Russian avant-garde art through the lens of Dada. This is the first book to approach Russian avant-garde art from the perspective of the anti-art canons associated with the international Dada movement. The works described and documented in Russian Dada were produced at the height of Dada's flourishing, between World War I and the death of Vladimir Lenin—who, incidentally, was a frequent visitor to Cabaret Voltaire in Zurich, the founding site of Dada. Like the Dadaists, the Russian avant-gardists whose works appear in this volume strove for internationalism, fused the verbal and visual, and engaged in eccentric practices and pacifist actions, including outrageous performances and anti-war campaigns. The works featured in this lavishly illustrated volume thrive on negation, irony, and absurdity, with the goal of constructing a new aesthetic paradigm that is an alternative to both positivist and rationalist Constructivism as well as metaphysical and cosmic Suprematism. The text and images show that, while not neglecting the serious project of public agitation for Marxist ideology, the artists often pushed the Dadaesque into Russian mass culture, in the form of absurdist and chance-based collages and designs. In such works, Russian "da, da (yes, yes)" was converted into a defiant "nyet, nyet (no, no)". Russian Dada, which accompanies a major exhibition at the Museo Reina Sofia, Madrid, includes 250 images, almost all in color, and essays by leading art historians. An appendix provides a wide selection of primary texts—historical writings by such key figures as Nikolai Punin, Kazimir Malevich, Varvara Stepanova, and Aleksandr Rodchenko. Essays by Margarita Tupitsyn, Victor Tupitsyn, Natasha Kurchanova, Olga Burenina-Petrova Artists Natan Altman, Vasili Ermilov, 41°, Ivan Kluin, Gustav Klutssis, Aleksei Kruchenykh, Valentina Kulagina, Vladimir Lebedev, Kazimir Malevich, Aleksei Morgunov, the Nothingdoers, Ivan Puni, Aleksandr Rodchenko, Olga Rozanova, Sergei Sharshun, Varvara Stepanova, Wladyslaw Strzeminski, Vladimir Tatlin, Igor Terentiev, Nadezhda Udaltsova, Ilya Zdanevich, Kirill Zdanevich Copublished with Museo Nacional Centro de Arte Reina Sofia in Madrid

More fascinating than fiction, *Seduced by Secrets* takes the reader inside the real world of one of the most effective and feared spy agencies in history. The book reveals, for the first time, the secret technical methods and sources of the Stasi (East German Ministry for State Security) as it stole secrets from abroad and developed gadgets at home, employing universal, highly guarded techniques often used by other spy and security agencies. *Seduced by Secrets* draws on secret files from the Stasi archives, including CIA-acquired material, interviews and friendships, court documents, and unusual visits to spy sites, including "breaking into" a prison, to demonstrate that the Stasi overestimated the power of secrets to solve problems and created an insular spy culture more intent on securing its power than protecting national security. It recreates the Stasi's secret world of technology through biographies of agents, defectors, and officers and by visualizing James Bond-like techniques and gadgets. In this highly original book, Kristie Macrakis adds a new dimension to our understanding of the East German Ministry for State Security by bringing the topic into

the realm of espionage history and exiting the political domain.

Enterprise resource planning (ERP) refers to large commercial software packages that promise a seamless integration of information flow through an organization. Traditionally, separate units were created within an organization to carry out various tasks, and these functional areas would create their own information systems thereby giving rise to systems that were not integrated. ERP strives to provide a solution to these problems. *Enterprise Resource Planning Solutions and Management* examines the issues that need to be further studied and better understood to ensure successful implementation and deployment of ERP systems.

Part of the *Romance of Empire* series produced in London during the first decade of the twentieth century, this dashing sweep of South African colonial history tells the story of the tip of Africa from the first European sighting in the 1400s right through to the end of the Second Anglo-Boer War in 1902. A marvelously politically incorrect book, this work draws upon original colonial records and accounts to provide now-hidden insights into the storyline of the longest lasting-and most influential-of European settlements in Africa. Read the thrilling accounts of the early Portuguese explorations, the arrival of the first Dutch colonists, the growth of the Cape Colony, the advent of slavery and its repercussions, the British occupation of the Cape, the endless frontier "Kaffir Wars", the Great Trek, the war with the Zulus, and finally the awful clash between Boer and Brit. An enthralling story, told in a forthright, frank but utterly engrossing style: "It is a little hard to realise that the Portuguese were exploring East Africa when the English were still fighting the Wars of the Roses, and that an army was being led three or four hundred miles up the Zambesi when Shakespeare was little more than a baby. It was the fate of the Portuguese to spend their blood and treasure looking for gold among the fever-stricken jungles and mangrove swamps of South-east Africa. The tales of death and massacre, of battles with cannibals and wild beasts to be found in the old Portuguese records would take a volume to themselves.

English Spelling and the Computer provides a thorough examination of spelling focusing in particular on the difficulties faced by present day spellers. Most people make spelling mistakes and while word processors with spellcheckers do offer some help, they do not catch all the errors and often make inappropriate suggestions. This book looks at common errors and explains why they are

made. A knowledge of the history and development is useful for understanding the problems of spelling and the difficulties spellcheckers are trying to address. The book therefore begins by examining the history of spelling and goes on to consider the arguments for and against reform. This is followed by an analysis of a large corpus of spelling errors including both the errors that people make when they do not know how to spell a word and the errors they make when they know how to spell the word but for some reason write something different.

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

Born in 1900 to a soon-to-be-widowed postmaster's wife in a small French village, Hélène Delangle's background offered no suggestion of the extraordinary life she was to lead. The first step was to leave the country behind and head to the city -- in this case, a Paris in the grip of an intoxicating 1920s blend of creativity and debauchery. She became a dancer, and then a stripper. But the demi-monde of gauze veils and admirers was not enough. A visit to the Actors' Championships, a uniquely French meeting of the theatrical world with the race-track, opened her eyes to the glamorous combination of machines and speed. Quickly establishing herself as a racer of uncommon talent and audacity, the beautiful woman now known as Hellé Nice -- Hellish Nice to her British fans -- then caught the attention of none other than Ettore Bugatti, founder of the marque with which her name will always be associated. And yet, despite the fame and the fortune she amassed in an unprecedented career, she died penniless and alone, an old woman in a crumbling Nice flat surrounded only by memories. *THE BUGATTI QUEEN* is the story of a great pioneer of motor racing who happened to be a woman. Re-creating her rollercoaster career with great verve and panache, Miranda Seymour brilliantly shows us a life now forgotten -- and makes it unforgettable.

This Is A New Release Of The Original 1908 Edition.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

This book constitutes the refereed proceedings of the 5th International Conference on Information Management and Big Data, SIMBig 2018, held in Lima, Peru, in September 2018. The 34 papers presented were carefully reviewed and selected from 101 submissions. The papers address issues such as data mining, artificial intelligence, Natural Language Processing, information retrieval, machine learning, web mining.

The history of Jaguar, a rousing British success story!

When Donald Healey displayed a new sports two-seater on his firms stand at the 1952 motor show

he could not possibly have envisioned the extraordinary success that it was to enjoy. There are many who would say that the looks of the early 100 were never matched by the later six-cylinder Healeys. Perhaps it is true that the first of the line is the purest expression of its designers intentions. Includes a detailed technical analysis of the 100, covering all aspects of the chassis, running gear, engine and transmission. This sets the scene for subsequent chapters on the BN2, the 100M and the 100S, each of which receives comprehensive treatment. The author also provides information on the cars participation in racing competition, draws comparisons with rival models and gives advice on the practicalities of owning a 100 today. This book opens with an exposition of the background to Donald Healeys creation of the 100 and with an account of his career to that time. This is followed by a description of the successive stages of design and development and of the eventual manufacturing agreement with Austin. Seven outstanding examples of the four-cylinder 100 - in-

cluding an unrestored Le Mans car - have been specially photographed for this book and are featured in 90 color images. There are also more than 140 black-and-white illustrations drawn from archives and from sales and publicity material.

Find out about more than 70 cat breeds, including their origins and characteristics, in this pocket-sized encyclopedia. This cat-alogue packs a whole lot of information into your pocket! Along with a photo of each breed, discover the facts and stats of each cat, including its size, where the breed originated, colors and markings, and unusual features or behaviors. You'll soon be able to tell apart a Burmese from a Siamese; a rex from a sphynx and a manx; and an American shorthair from a British shorthair. You will also discover a lot about colors and patterns. Did you know that tabby cats and tortoiseshells are not breeds, but colors within breeds? Plus there are pages introducing cat anatomy and behavior; and the book finishes with fun facts. The style of the Pocket Eyewitness series is perfect for all children, from reluctant readers who can easily digest the key points through

to budding vets and cat-lovers who want to know more about the best pets on the planet. Cats with facts: what more could anyone want?

This is the eighth title in the now well-established In Detail series. Its subject, the Jaguar XK120, has become one of the immortals of sports car history and remains one of the most beautiful cars ever built. It took the London Motor Show by storm in 1948, and was built until 1954. Combining extraordinary docility with a startling 120mph top speed, it was the car to be in, whether for cruising California boulevards or racing at Le Mans. The book is published in association with the Jaguar Daimler Heritage Trust and written by the Trust's Archivist. Drawing from company records and archives, he has been able to provide information on the XK120 that has never been available to enthusiasts before. This, and its focus on the XK120 alone rather than on the whole XK family, make this book uniquely informative.
