You might be surprised to know that these designs aren't just geometric shapes either! From skulls to gears, stars, and more there's numerous ideas to be inspired by. Look, it's simple. If the 3D tattoo you just got inked makes it seem like there's a massive hole in your arm, then it's wildly successful.

Patterns typically repeat in an organized way in drawings and designs. If you draw designs and patterns from the dots on the template you can create connecting designs that fluidly move around the final 3D geometric shapes. Experiment with your designs and watch how they change when folded in to a 3D shape.

Take your pick from famous Creative Haven® and Masterworks collections, 3-D coloring books, stained glass and Color Your Own editions, Build a Poster and Window titles, mandalas and other geometric designs, and so much more!

#### Coloring Books - Dover Publications

I highly recommend printing the nets on stock paper rather than regular paper. I have tried it both ways, and regular paper is just too flimsy. After printing, simply cut out the 3d shape nets on the solid lines.. If you've printed on white card stock as I have, take some time to get creative and color or decorate the shapes before assembling them! This could make a great math art project!

#### Foldable 3D Shapes (FREE Printable Nets!)

Geomagic ® Design X™ makes it easy to extract new value from existing products by creating CAD models from 3D scans faster, more accurately, and more reliably than any other reverse-engineering method.. Handles large scan data sets (millions of points) faster than any other reverse-engineering software. Creates complex 3D models with hybrid modeling for solid, surface, and mesh.

#### Geomagic Design X 3D Reverse Engineering Software

Geometric Exercises in Paper Folding is a book on the mathematics of paper folding. It was written by Indian mathematician T. Sundara Row, first published in India in 1893, and later republished in many other editions. Its topics include paper constructions for regular polygons, symmetry, and algebraic curves.
