Homegrown Horsepower: Four-cylinder MerCruiser In A Dragster! By Jason Reiss June 05, 2014 The initial reaction when opening the email EngineLabs received from Chris Nichols was one of wonderment, and as the details came forth it was determined that this was a build definitely worth of the Homegrown Horsepower segment.

It was a 3.7-liter inline four-cylinder engine that produced 170 horsepower, a powerful alternative to the 160- and 165-horsepower six-cylinder Mercury engines. The 470 featured a cast aluminum engine block designed by Mercury Marine, the name Kiekhaefer's company had taken in 1969, and the

block was mated with an iron cylinder head from the Ford 460 V-8 engine.
