According to the National Highway Traffic Safety Administration, "of the nearly 9.1 million passenger car, SUV, pickup and van crashes in 2010, only 2.1% involved a rollover. However, rollovers accounted for nearly 35% of all deaths from passenger vehicle crashes. In 2010 alone, more than 7,600 people died in rollover crashes." Rollover accidents continue to be a leading contributor of vehicle deaths. While this continues to be true, it is pertinent to understand the entire crash process. Each stage of the accident provides valuable insight into the application of reconstruction methodologies. Rollover Accident Reconstruction focuses on tripped, single vehicle rollover crashes that terminate without striking a fixed object. Topics featured in this book include: • Analysis methods through various accident phases, including advanced simulation • Vehicle event data recorder usage • Occupant ejection during rollover crash The goal of this title is to break down the various phases of a rollover crash to analyze each stage for use in the reconstruction process - to the greater understanding of crash analysts, consultants and safety engineers alike.

Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Escalating gang violence in Denver, Colorado, and in other large U.S. cities captures the attention of the first term President. He wants a solution, and he wants it NOW—but legislation takes years. The Director of Homeland Security suggests that the remedy to the deteriorating situation may be a highly classified program deep within the special charter of FEMA known as Annex K. This deep-black pro-

gram, nicknamed STARDUST, would be executed beneath the heaviest cloak of secrecy and without the informed consent of Congress.

When the CIA sends Agent Dave McClure to Denver to investigate inexplicable lethal violence being waged with advanced weaponry against organized street gangs, McClure discovers that what has been unleashed is a sinister solution far worse than the problem. He unearths a nightmarish plot to do much more than eliminate gangs in America—rather, it's an attempt to seize the military district of Washington and overthrow the federal government. McClure's own life is now at especially high risk, and the CIA must act quickly and with overwhelming force. But time is short...and the clock is ticking!

#1 NEW YORK TIMES BESTSELLING AUTHOR Southern Cross is the second book in the Andy Brazil series, from Patricia Cornwell. Judy Hammer has accepted the challenge of Richmond, Virginia's police department to try and reverse the escalating crime statistics in the city. She brings with her Deputy Chief Virginia West and Andy Brazil, now a full-time police officer. They find a lot of things they are all too familiar with - teenage gangs, a rash of robberies at cash dispensers, street corner drug-dealing, racial tensions, too many people with too many guns and a cardiac inducing lack of parking spaces. They also meet resentment from the established police force and over-high expectations from the city's institutions. Then a computer virus crashes the police computer, freezing their screens with a design of blue fish, and the same blue fish appears on the statue of Jefferson Davis, which a graffiti artist has turned into a black basketball player and a gang called the Pikes claim it is their symbol, which also has links to the robberies. In an incredibly fast-moving police procedural Patricia Cornwell takes her readers on a roller-coaster ride of action and emotion. Blood Highways is the heart-wrenching account of the biggest product liability case in history: the Ford-Firestone fiasco. At the center of the story are two people: Tab Turner, a charismatic trial attorney from Arkansas, who has made a career out of forcing Ford and other automakers to own up to knowingly trade human lives for profits; and Donna Bailey, a single mother and outdoor enthusiast who fought back from the brink of death to confront those ultimately responsible for her accident. Weaving together harrowing depictions of the accidents and their consequences with the stories of the men and women who labor to police the auto industry and its reckless cost-cutting, Blood Highways will transform the way you view corporations, the government, the courts, and the media. Above all, this book shows the price the public pays in wrecked and mangled lives when companies focus more on shaving costs than making quality products.
