'The astoundingly well reported and beautifully told story of the downfall of what was once a great American company. A must-read' Bethany McLean, bestselling author of *The Smartest Guys in the Room* 'Compelling and richly reported, *Flying Blind* is about so much more than the sad decline of Boeing and the tragic mistakes that led to the 737 Max disaster. It's also the urgent story of how the almighty profit motive supplanted a culture of engineering excellence in boardrooms across America' Brad Stone, bestselling author of *The Everything Store* The definitive exposé of how Boeing put profit before passengers, leading to the devastating loss of life in the 737 MAX crashes and the downfall of an American business giant In examining

the history of the 737, *Flying Blind* explores how Boeing's new management degraded a highly-regarded plane with cost-focused mandates and skimmed on testing in the race to match a competing plane from Airbus. How Boeing outsourced software work to poorly paid graduates in India and convinced the US Federal Aviation Authority to put the MAX into service without requiring pilots to undergo simulator training, and how ultimately these failures resulted in the deaths of 346 Boeing passengers. Framed around the 737 MAX crashes, *Flying Blind* is the definitive exposé that for the first time tells the larger, decades-long story of how a corrupt corporate culture paved the way for a cataclysm that cost lives. 'Vividly written and meticulously researched, *Flying Blind* is a story everyone - every consumer, every citizen,

every worker in every industry - needs to read' Diana B. Henriques, New York Times bestselling author of *The Wizard of Lies: Bernie Madoff and the Death of Trust* 'A gripping narrative and required reading for anyone who wants to understand how one of America's mightiest corporations veered so badly off course' Sheelah Kolhatkar, New Yorker staff writer and bestselling author of *Black Edge*

The Boeing 727 Study Guide is a compilation of notes taken primarily from flight manuals, but it also includes elements taken from class notes, computer-based training, and operational experience. It is intended for use by initial qualification

crewmembers, and also for systems review prior to recurrent training or check rides. The book is written in a way that organizes in one location all the buzz words, acronyms, and numbers the average pilot needs to know in order to get through qualification from an aircraft systems standpoint. The book covers the Boeing 727-100 and 727-200 versions.

Witty, compelling, and shrewd, Mansfield's *Book of Manly Men* is about resurrecting your inborn, timeless, essential, masculine self. The Western world is in a crisis of discarded honor, dubious integrity, and faux manliness. It is time to recover what we have lost. Stephen Mansfield shows us the way. Working with timeless maxims and stirring examples of manhood from ages past, Mansfield issues a trumpet call of manliness fit for our times. "My goal in this book is simple," he says. "I want to identify what a genuine man does—the virtues, the habits, the disciplines, the duties, the actions of true manhood—and then call men to do it."

This is a perfect course book for students and a perfect companion for professionals/researchers in the medical and health sciences who care about the quality and

meaning of the measurements they perform.

This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references, but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available, but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner

Welcome to a new edition of the most successful collection of aeronautical books in America. At the request of readers around the world, we have created this magnificent literary work about everything that a pilot in training must learn about one of the most flown aircraft in the world, the magnificent Boeing 737. With the collaboration of Captain Aldo Tatoli, with more than 30 years of airline experience, we have developed an educational manual based on the models of B737-700,

B737-800 and B737-900. An educational guide that will take the reader to know the main components of the aircraft, its systems and the principle of operation of each of them. A work based on the extensive experience of Captain Aldo Tatoli, who has commanded B737 in almost all its versions. An unparalleled contribution to the aeronautical market, where pilots and fans demand more and more information and material to study every day. A work that promises to be the starting point for many more titles about this incredible aircraft. Our special thanks to Captain Aldo Tatoli for his participation, his dedication to teaching and his enormous passion for aviation.
