### U5IM6M - FARMER DRAKE

---

For over 35 years Roy Lanchester has been one of Britain's motoring journalists. In that time he has driven, dined, drunk and laughed, all at other people's expense. In this memoir he looks back at his life and career, from his early days as a cub reporter, through his halcyon time as a Fleet Street motoring hack in the 1980s, up to his reign as one of the country's best-known and thirstiest regional journalists. Roy has always been notoriously outspoken and he holds back nothing in this book, which includes tales of his failed marriages, his rows with press officers, and his incident with Nigel Mansell, although the lawyers later asked for this to be removed. If you've ever wondered what it takes to forge a career writing about cars in the face of setbacks, cutbacks and uncooperative bar-men, *How To Be A Motoring Journalist* will tell you everything you want to know, and some things you don't.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolu-

tion of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

It was a 1972 Rally 200 in the same shade of orange as Donatella Versace with white, go-fast stripes down each side. It was bright and brash and made every other Vespa in the workshop look dull. Even sitting on its stand it had a swagger. Best-selling writer and traveller Peter Moore decides to go on an adventure through Sicily, Sardinia and the Amalfi Coast as a last fling before the onset of fatherhood. Riding his bright orange Vespa, Marcello, through some of the world's most stunning scenery, Peter meets a multitude of interesting characters and discovers a side of Italy that tourists rarely see. Eliciting free beers from barmen, swoons from young women and beeps and whistles from other drivers, Peter finds that this most Italian of machines draws him deep into the heart of this fascinating and fun-loving country.

Bernt Spiegel's The Upper Half of the Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set. Hop on and take a wild ride into a growing American cultural phenomenon

Eighteen million Vespas have buzzed their way into the world since 1946. Stood end to end, they would form a line measuring 32,000 kilometres – 20,000 miles – in length. This is an almost inconceivable statistic, as with many things that transcend conventional measures and at some point achieve cult status. How did the little machine come so far? The answer is simple. The Vespa has always remained the Vespa, true to itself, and has what others lack: real character! This book tells the Vespa's story via over 470 photos, corrects many misconceptions and lets the reader become immersed in the culture of Vespa and la bella vita.

In a universe on the brink of war, Amethyst, one of the few remaining Magi, seeks revenge for the murder of her father. She was born with the ability to cast spells using the magically imbued caster passed down to her from her father, and she will stop at nothing to sate her desire for revenge. But when she becomes embroiled in the machinations of a corrupt Cardinal, whose intentions may very well plunge the universe back into total war, she must ally herself with new friends, a former love, and a hated enemy to snuff out the first spark of war. Her snarky attitude, caster, and a plethora of frost spells may not be enough save her.

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose *The Mercedes-Benz 300 SL Book* has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

This publication accompanies the first comprehensive museum survey of the American artist. Chakaia Booker: *The Observance* explores the artist's signature form--monumental works made of rubber--while showcasing her artistic innovations across mediums. With new photography of the wide-ranging exhibition at ICA Miami, historic images, and newly commissioned scholarship, the publication illuminates key themes in the artist's practice. With special attention to Booker's totemic and anthropomorphic assemblages fabricated from cast-off tires, the volume highlights Booker's ongoing expression of ecological and technological concerns, examinations of racial and economic disparities, and her interest in the symbolism of the automobile in American culture. Alongside essays by Erin Jenoa Gilbert, Aruna d'Souza, and Stephanie Seidel as well as an interview with the artist by Alex Gartenfeld, this catalog includes some of Booker's most topical works, including *Chu Ching* (2012), a cross on a wheelbarrow that resembles Jesus being dismounted from the cross. The artist's photographic series, "Foundling Warrior Quest" (2010) and "Graveyard Series" (1995), are featured

to explore the importance of performance and mythology in her practice. Anchoring the book is *The Observance* (1995), an immersive installation made of deconstructed rubber tires and tubes--Booker's first large-scale installation in this signature material, chosen by the artist for its associations with riots.

My buddy Wagner is a nice friend... He loves so much to draw and sometimes even forget that I'm just there waiting for us to play together ... Sometimes whenever he stares at me, I think that he will throw a ball for me to grab in the air and show-off for him. But then he looks back and go for his notebook, and stares back at me like a child scribbling ... Sometimes he talks to me with in a very strange and weird voice; I fell a little afraid of the way he does that. There are times I do not understand why after he wets me and he seem to regret it because he immediately dry me up with a nice smelling towel. He taught me many things of his little world like sit, stop, dance, run , pee in right places and to play ball - that I enjoy so much ! I can state here that he really loves his drawings much more than me because he is always there playing with his notebook....
