For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Routledge Companion to Museum Ethics is a theoretically informed reconceptualization of museum ethics discourse as a dynamic social practice central to the project of creating change in the museum. Through twenty-seven chapters by an international and interdisciplinary group of academics and practitioners it explores contemporary museum ethics as an opportunity for growth, rather than a burden of compliance. The volume represents di-

verse strands in museum activity from exhibitions to marketing, as ethics is embedded in all areas of the museum sector. What the contributions share is an understanding of the contingent nature of museum ethics in the twenty-first century—its relations with complex economic, social, political and technological forces and its fluid ever-shifting sensibility. The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most. It argues for a museum ethics discourse defined by social responsibility, radical transparency and shared guardianship of heritage. And it demonstrates the moral agency of museums: the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self-reflective and activist practice.

Since its publication in 1677, Spinoza's Ethics has fascinated philosophers, novelists, and scientists alike. It is undoubtedly one of the most exciting and contested works of Western philosophy. Written in an austere, geometrical fashion, the work teaches us how we should live, ending with an ethics in which the only thing good in itself is understanding. Written by an internationally known team of scholars, it is the first anthology to treat the whole of the Ethics and is written in an accessible style. While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations (IR), those writing on topics such as war, peace, rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates. The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature, and how issues, problems and policies involving ethics are addressed by a variety of actors within the international system. This indispensable research companion widens the perspective from 'ethics and international relations' to 'ethics in international relations', redressing the (mis)perception that ethical concepts, principles,

norms and rules are not in part constitutive of the international system and the agents acting within that system. Necessarily cross-disciplinary, expertise is drawn from IR and also philosophy, political theory, religious studies, history and law, making this an ideal volume for any library reference collection.
