This book, 'Fibre production in South American camelids and other fibre animals', covers the latest advances in the main fields of animals producing fibre. It deals with a wide scope of fibre animals and a great variety of subjects and is supported by the Animal Fibre Working Group belonging to the European Association of Animal Production. The book can be considered a valuable attempt to prepare the fibre production sector for rapid changes and innovations arising within a globalised world. The focus lies on fibre animals such as alpacas, llamas, vicunas and guanacos, but recent research on sheep, goats and rabbits is also included.

The most important themes addressed are meat and fibre production, breeding and genetics, nutrition, reproduction, management, and health. Finally, the book closes with specialised discussions on fibre production related topics, which for example provide a more in-depth look at common management denominators between South American camelids and other fibre animals. The book addresses scientists, professionals, technicians, farmers, specialised governmental policy makers and students all around the world who are involved in fibre animal production (such as sheep, camelids, goats, or rabbits). This book will present them with the most current findings in this area.

Paul's epistle to Philemon is one of the shortest books in the entire Bible, and it certainly leaves plenty to the imagination. From the pen of an accomplished New Testament scholar, this vivid historical fiction account follows the slave Onesimus, fleshing out the lived context of first-century Ephesus and providing a social and theological critique of slavery in the Roman Empire.

His eyes scanned all over the place and all he could see was fog-

gy black. There is no other sound besides the breath. There is no other object besides the snow pile. Nobody. He felt alone and then scared. Silence is tense even though the storm hasn't stopped. Blood flowed fast and out of nowhere he got the strength to immediately reach the orange point in front there. In one night, things can change so fast. He thought he could still sleep on his warm mattress tonight. He imagined eating sandwiches tomorrow morning and playing in the snow afterwards. He remembers that it will be Christmas soon. Ah, Santa won't come this year. The closer and bigger the flame he saw. Hope clotted in a puff of cold steam from his mouth. Shortly after the wooden roof was visible, his vision blurred, his body falling with the approaching footprints. The sound of snow being trampled like an oasis. No matter who or what approached him, he just felt he was not alone anymore and could rest for a while without fear.

Struggling? Juggling? Drowning? Argh! These experiences of overwhelm can be a common part of a normal day or week in our life. Yes, the world can be an overwhelming place. We might have an

emotional experience of being overwhelmed. We can experience the 'too much on' of workload - too much to do and not enough time in which to do it. Or we might feel like we're submerged under an endless pile of information, reports, books and reading. At other times we can just be plain 'drowning in it', from a wicked combination of all three: emotions, workload and information. In today's world, it's these three that can be the cause of repeated and unending overwhelm. And it's not good for us. Burn-out and health issues are waiting. We need to find ways to acknowledge our emotions, manage our workload, and filter all of that information. Our overwhelm CAN be outsmarted. Using the powerful techniques shared by Lynne Cazaly, you'll find new ways to make sense of overwhelm, new ways to work, and new ways to cope with information. You'll be all over overwhelm... it won't be all over you.
