Electric and hybrid cars explained | What Car? Introduction to Hybrid Electric Vehicle Systems. PD291809. Topics/Outline. Requirements. Instructor. Registration Info. Hybrid Electric Vehicle (HEV) models currently populating the vehicle electrification landscape indicate their dominance in the market. Although electric, plug-in, and fuel cell vehicles are making inroads in the market, the HEV stands as the market leader in adoption, and manufacturers have no plans on diminishing HEV production.

Introduction to Hybrid Electric Vehicle Systems—SAE Training A series hybrid electric vehicle is one which is propelled exclusively by one or more electric motors, not a combustion engine, and a generator switches on to charge the batteries when they are low. One advantage of this setup is relatively high efficiency due to the fact that the generator (which is powered by a combustion engine) is operated at a constant speed which at which its efficiency is highest.
