Designed primarily for middle and junior management who deal with financial information without really understanding the content; students who are studying accounting as a non-specialist subject, for example on a business studies or engineering course. The book serves as a basic reference to be used throughout the course. It will also be particularly helpful in providing the basic grounding that is required before moving on to the more technical and in-depth study of the subject that may be required on some

courses. Students who are embarking on a course of study to become a professional accountant will also find this book of major benefit. In addition to revisions through out, a new new chapter 'Making long-term investment decisions' covering capital investment decisions, extends and rounds out the final part of the book: using Financial Information to Manage a Business. The chapter deals with the investment appraisal process and covers the main investment appraisal techniques from the point of view of a non-specialist: payback periods, accounting rate of return and discounted cash flow methods are just some of the new topics covered. The focus will be on the level of understanding that a non-specialist requires in the work place as such, in keeping with the rest of the book, the chapter includes practical examples and exercises to enhance the reader's understanding. Jargon free and easy to understand - no prior knowledge of the subject necessary Focuses on the principles and use of accounting information Review questions to assess progress at each stage and many fully worked exercises and examples

* Challenging and provocative book * Shows how management accounting techniques can be integrated into the strategic decision making process * Extensive use of practical examples from a variety of contexts. An introduction to business strategy for manage-

ment accountants, financial accountants or managers with an accounting orientation. The book places management accounting clearly within the context of strategic management of the business. Offers qualified accountants a sound introduction to strategic management, and with practical examples and mini-cases provided throughout, this book is comprehensive yet concise. Keith Ward addresses strategic management accounting as a continuous process of analysis, planning and control. Management accounting is about supplying the right information to the right people at the right time, and this can only be expressed in the context of the business strategy and strategic plan. The implementation of appropriate management accounting systems to complement different strategies is discussed in detail. Applications and examples include multinational organizations, non-profit organizations and varying organizational structures. Finally the author covers methods of using management accounting for strategic advantage.
