Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting.

Accounting is a collection of systems and processes used to record, report and interpret business transactions. An account is an explanation or report in financial terms about those transactions. Accountability arises from the stewardship function under which managers have to provide an account to other stakeholders in the business.

[Accounting For Managers: Interpreting Accounting ...](#)

Emphasizing the interpretation as opposed to the construction of accounting information, Accounting for Managers encourages a critical rather than unthinking acceptance of accounting techniques. Whilst accounting information is immensely valuable for planning, decision making and control, users need to recognize the assumptions behind, and the limitations of, particular accounting techniques.
