Applying actions and scripts to PDFs

Although JavaScript requires a scripting host application, it is not tied to any particular implementation. The language is developed and standardized by the ECMA independently of the scripting hosts. The scripting host in a Web browser exposes the "host objects" such as window, document (DOM) and location objects to the JavaScript engine. Similarly, in Adobe Reader, Adobe Acrobat and other applications, the viewer exposes several host objects to the JavaScript engine.

In the JavaScript section of the Acrobat preferences, there is a new check box called Enable Global Object Security Policy (select Edit > Preferences > JavaScript). When this preference is checked (the default), each time a global property is written, the origin that set it is remembered.
