Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate - from advantages to complications - in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.

In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Includes section "Recent literature."

Information on the educational systems of Israel and the Occupied Territories (West Bank and the Gaza Strip) and guidelines on placing students from this region in U.S. high schools and colleges are presented. After describing the country and territories, attention is directed to preschool, primary, and intermediate education; secondary education; teacher training and the education profession; nursing and other health professions; overseas student programs in Israel; technological education; higher education; and the United Nations Relief and Works Agency for Palestine Refugees in the Near East. Profiles of technical and higher education institutions in Israel and the Occupied Territories cover degrees/diplomas, admission requirements, college programs, and school characteristics. General information on Israeli higher education includes: college organization and administration, the grading and credit systems, examinations, and degree programs. Guidelines for admissions officers focus on the admissibility and appropriate level of placement of students from Israel and the ter-

ritories in U.S. schools. A glossary and list of postsecondary technological/vocational schools are appended. (SW)

This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries

and European countries,. We invited science education experts from 29 "Belt and Road" countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road.

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.).

Offers information on entrance and degree requirements, expenses and financial aid, programs of study, and faculty research specialties.
