---

Scheduled Operation — any common carriage passenger-carrying operation for compensation or hire conducted by an air carrier for which the air carrier or its representatives offers in advance the departure location, departure time, and arrival location. It does not include any operation that is conducted as a supplemental operation under 14 CFR Part 121 or public charter operations under 14 CFR Part 380.

#### **Aircraft carrier - Wikipedia**

#### **14 CFR § 139.5 - Definitions. | CFR | US Law | LII / Legal ...**

Air carrier operation means the takeoff or landing of an air carrier aircraft and includes the period of time from 15 minutes before until 15 minutes after the takeoff or landing.

US carriers must hold either a Certificate of Public Convenience and Necessity or an exemption in order to provide air transportation for compensation or hire, and must obtain an air carrier...

#### **Air Carrier Operations**

Modern United States Navy aircraft carrier air operations include the operation of fixed-wing and rotary aircraft on and around an aircraft carrier for performance of combat or noncombat missions. Modern United States Navy aircraft carrier flight operations are highly evolved, based on experiences dating back to 1922 with USS Langley.

The official FAA definition is a scheduled operation of at least “5 round trips per week on at least one route between two or more points according to the published flight schedule.” Here’s the kicker: it only applies to airplanes carrying 9 passengers or less (think King Air 350 or a Caravan), and cargo less than 7,500 pounds.

Traditionally an aircraft carrier is supposed to be one ship that can perform at least power projection and sea control missions. Aircraft carrier must be able to efficiently operate an air combat group. This means it should handle fixed-wing jets as well as helicopters.
