Alzheimer's Disease Diagnostic Market (2020-2029 ...

TauRx's drug, LMTX, is meant to block the activity of a bodily protein that many neuroscientists believe contributes to the brain-destroying effects of Alzheimer's.

TauRX is actively recruiting for a clinical trial to test the LMTX in people with early Alzheimer's disease, according to ClinicalTrials.gov. A full list of locations of clinics and how to get involved can be found here. The results were published in the Journal of Alzheimer's Disease. By Emily Woodruff

Tau in Alzheimer Disease and Related Tauopathies

Alzheimer's disease is a progressive mental deterioration that can occur in middle or old age, because of generalized degeneration of the brain. It is the commonest cause of premature senility. This is one of the growing problems in today's generation and it is because of this TauRx had to come in the market.

Harrington C, Rickard JE, Horsley D, Harrington KA, Hindley KP, Riedel G, et al. Methylthionium chloride (MTC) acts as a tau aggregation inhibitor (TAI) in a cellular model and reverses tau pathology in transgenic mouse model of Alzheimer's disease. *Alzheimer's & Dementia*. 2008; 4:120.

TauRx is leader in Alzheimer's disease research. Our mission is to discover, develop and commercialise innovative products for the diagnosis, treatment.

Promising Alzheimer's treatment flops in new trial

Neurofibrillary tangles are insoluble twisted fibers found inside the brain's cells. These tangles consist primarily of a protein called tau. Learn more about the connection of tau to Alzheimer's disease and current research that is focused on this protein.

Overview. Alzheimer's disease is a progressive disorder that causes brain cells to waste away (degenerate) and die. Alzheimer's disease is the most common cause of dementia — a continuous decline in thinking, behavioral and social skills that disrupts a person's ability to function independently.
