Duane the polar bear and the other animals of the very, very far north find their friendships deepening as they are challenged by the arrival of a contentious weasel and an unexpected departure. It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, Atlas Obscura celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobob tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, ATLAS OBSCURA revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. ATLAS OBSCURA is for the explorer.

Explore the world of birds with this highly-illustrated children's atlas. Which bird migrates the furthest? How do birds find a mate? What can we do to help endangered birds? Fully updated for its 25th anniversary, The Bird Atlas answers all these questions and more. This lavishly illustrated atlas for children is not your average guide to birds. It takes children on a tour, continent by continent, to meet the birds of the world. Within each section, the book travels through different biomes, such as mountains, deserts, and rivers; and specific regions, from the Mediterranean to the Everglades, Galapagos, and Himalayas. The Bird Atlas is packed with beautiful, life-like illustrations of birds from all over the world, with maps showing precisely where they are found. There are many books that can tell you toucans live in the Amazon rainforest, but this book shows where in the vast habitat you could spot the species. Every continent is introduced with an overview of the ecology, climate, and landscape; and the typical and record-breaking birds that live there. The book also explains the anatomy of a bird, traces migration routes, and highlights endangered species.

This stunning new atlas is your first class pass on a world tour of the homes of Earth's most amazing animals. The latest exciting title in DK's popular illustrated atlas series maps out the habitats of the world's most incredible mammals, fish, birds, reptiles, amphibians, and invertebrates. Whether it's plotting the range of a lion, following the flight paths of birds, or tracking great white sharks in the oceans, you will see exactly where and how almost 100 extraordinary animal species live. What makes Animal Atlas unique is the maps themselves. Each one is individually commissioned in 3D, with detail to show the habitat of each animal, as well as its geographic location. This reveals an astonishing amount of information about the behaviour of these animals, from how polar bears

adapt to survive in freezing Arctic conditions to how African elephants survive in the heat of the Sahara desert. There is also a focus on the conservation and protection of animals. Maps reveal the shrinking territories of some species, showing where they used to roam in the past compared to what's left of their range today. Whether you are doing a homework project or simply want to know more about what animal lives where, Animal Atlas is the perfect reference for home or school. Atlas tours cities around the world, including Rome, New York, and Kenya and after years of a lone existence he decides to become one of the Earth's newest heroes.
