Science and Technology—Ancient Greece

Ancient Technology Dating back thousands of years are numerous examples of ancient technology that leave us awe-struck at the knowledge and wisdom held by people of our past. They were the result of incredible advances in engineering and innovation as new, powerful civilizations emerged and came to dominate the ancient world.

Here are some of the inventions that are typically attributed to the Ancient Greeks. Watermill - A mill for grinding grain that is powered by water. The Greeks invented the waterwheel used to power the mill and the toothed gears used to transfer the power to the mill.

During the 5th century BC, ancient Greek technology developed, leading to the invention of the rotary mills, screw, water pump, gear, water organ, water clock, the torsion catapult and the use of steam to operate machines and toys. The foundation, for the use of water resources, in the modern world, was laid by the Greek civilization.

The ancient Greeks made many contributions and inventions in the fields of technology, math and science. The Greeks made great advances in the arts. The teachings of Socrates, Plato, and Aristotle are the foundations of philosophy today. In addition, the Greeks made key discoveries in math, medicine, and engineering. Top Inventions and Discoveries of Ancient Greece: Olympics Modern Olympic is a latest form of the Olympics which ancient Greeks introduced more than 2,700 years ago. Historical records show that the first ancient Olympic Games can be traced back to 776 BCE. In the very first event, there was only one event called the Stadion.

Top Inventions and Discoveries of Ancient Greece

Many houses in ancient Greece were equipped with closets or latrines that drained into a sewer beneath the street (Hamilton). Sinks- The ancient Hellens were the first to have an automated sink with running water, so both hands could be washed at the same time (Hamilton). The ancient Greeks washed themselves with lumps of clay, had steam baths and rubbed their skin with oil, such as olive oil, which they then scraped off with an instrument called a "strigil", along with any dirt (Hamilton).
