result, the American Petroleum Institute was able to publish ANSI / API RP 754: Process Safety Performance Indicators for the Refining and Petrochemical Industries in April of 2010. A starting point in the development of any set of indicators is to define the scope.

Designation: ANSI/API RP 754 2ND ED (E1) Process Safety Performance Indicators for the Refining and Petrochemical Industries; Second Edition. Active Standard. 1.1 General. This recommended practice (RP) identifies leading and lagging process safety indicators useful for driving performance im-

provement.

Process Safety: Understand the Changes in API RP 754 The second edition of this standard on process safety performance indicators contains some important revisions. By Kelly K. Keim, ExxonMobil Research and Engineering, on behalf of the American Petroleum Institute. Mar 08, 2017

6 CONTRIBUTIONS OF RP 754
www.csb.gov 11 Contributions of RP 754 • Highlights the need and establishes some “obligations” (ANSI , not legal) for the use of legal) for the use of process safety indicators in the industries. • Defines a frame-
