ASLA Installs Green Roof on Headquarters | BuildingGreen

country, the American Society of Landscape Architects (ASLA) has recently completed an innovative example of vegetated rooftop at its national headquarters in Washington, D.C. Unlike many conventional green roofs that clothe a building's existing pro-file with the requisite structure, soil, and plants, Michael Van Valkenburgh

Challenge. In 2004, ASLA began to investigate installing a green roof on its 12-year-old, 3-story headquarters building in Washington, D.C. The building's original rubberized membrane roof had already begun to develop pinhole leaks, and a structural engineering study showed that the roof had additional load capacity to accommodate an extensive green roof.

Green roofs are an important part of landscape (re)design in the city. A green roof is not only functional for storm water management, it can also give an unique identity to a roof by adding special plants, structures of colors. Sempergreen provides expertise in any stage of your project, from design till execution.

As the largest urban rooftop farm in Asia, the 22,000 sq. m. (236,806 sq. ft.) Thammasat University Green Roof tackles climate impacts by incorporating modern landscape architecture with traditional agricultural ingenuity, the green roof, urban farming, solar roof and green public space.

The ASLA roof features many different soil depths, ranging from three inches on the flat portion to 21 inches on the elevator shaft, to accommodate the roof's strength in different areas while also showing different types of green roof designs.

ASLA's green roof, in Washington, D.C., was designed and constructed by Michael Van Valkenburgh Associates, Inc.; ... courtesy of the American Society of Landscape Architects The American Society of Landscape Architects (ASLA) cut the ribbon on the new green roof over its Washington, D.C., headquarters on April 26, 2006.
