In this work, here presented in a complete English edition for the first time, the problem of knowing God is confronted in an original and stimulating way. Taking up the Prophet's teaching that 'Ninety-nine Beautiful Names' are truly predicated of God, Ghazali explores the meaning and resonance of each of these divine names, and reveals the functions they perform both in the cosmos and in the soul of the spiritual adept. Although some of the book is rigorously analytical, the author never fails to attract the reader with his profound mystical and ethical insights, which, conveyed in his sincere and straightforward idiom, have made of this book one of the perennial classics of Muslim thought, popular among Muslims to this day. This volume won a British Book Design and Production Award in 1993.

"Gripping, page-turning material . . . a new way of thinking about survival in a world filled with hazards and distractions." —Charles Duhigg, author of *Smarter Faster Better* and *The Power of Habit*  
A safety expert reveals why few of us are as careful as we think we are, and what we can do about it. As doctors and medical researchers work busily to extend our lives, more people each year are figuring out ways to cut them short. In fact, after a hundred years of steady decline, the rate at which people are being injured (or worse) in everyday accidents is increasing. Blame car crashes, pedestrian fatalities, home-improvement projects gone wrong, medical mistakes, home fires—not to mention all the crazy things that kids are into these days. And the problem seems to be spinning out of control. Steve Casner has devoted his career to studying the psychology of safety, and he knows there's not a safety warning we won't ignore or a foolproof device we can't turn into an implement of disaster. Casner details the psychological traps that prevent us from being more careful. They're the same whether you're a pilot, a Hollywood stuntwoman, a parent, or the owner of a clogged dishwasher you're trying to fix with a screwdriver. Then he shows us gripping real examples of how and when injuries happen, so we know exactly what we should really be worrying about. Careful arms readers with the latest science on how our sometimes fallible minds work, with countless takeaways to incorporate at home, at work, and everywhere in between. This book will help us keep our fingers attached in the kitchen, our kids afloat at the pool, and our teens safe behind the wheel, and demonstrates the many other ways we can maximize our chances of getting through the day in one piece.

The Reconstruction of Religious Thought in Islam (1930) is Muhammad Iqbal's major philosophic work: a series of profound reflections on the perennial conflict among science, religion, and philosophy, culminating in new visions of the unity of human knowledge, of the human spirit, and of God. Iqbal's thought contributed significantly to the establishment of Pakistan, to the religious and political ideals of the Iranian Revolution, and to the survival of Muslim identity in parts of the former USSR. It now serves as new bridge between East and West and between Islam and the other Religions of the Book. With a new Introduction by Javed Majeed, this edition of *The Reconstruction* opens the teachings of Iqbal to the modern, Western reader. It will be essential reading for all those interested in Islamic intellectual history, the renewal of Islam in the modern world, and political theory of Islam's relationship to the West.

Exploring the lively polemics among Jews, Christians, and Muslims during the Middle Ages, Hava Lazarus-Yafeh analyzes Muslim critical attitudes toward the Bible, some of which share common features with both pre-Islamic and early modern European Bible criticism. Unlike Jews and Christians, Muslims did not accept the text of the Bible as divine word, believing that it had been tampered with or falsified. This belief, she maintains, led to a critical approach to the Bible, which scrutinized its text as well as its ways of transmission. In their approach Muslim authors drew on pre-Islamic pagan, Gnostic, and other sectarian writings as well as on Rabbinic and Christian sources. Elements of this criticism may have later influenced Western thinkers and helped shape early modern Bible scholarship. Nevertheless, Muslims also took the Bible to predict the coming of Muhammad and the rise of Islam. They seem to have used mainly oral Arabic translations of the Hebrew Bible and recorded some lost Jewish interpretations. In tracing the connections between pagan, Islamic, and modern Bible criticism, Lazarus-Yafeh demonstrates the importance of Muslim mediation between the ancient world and Europe in a hitherto unknown field. According to Fiqh E Jaferia..... Islamic Medical Wisdom - The Tibb al-A'imma by Imam Ali ibn Abu Talib (as) (Author), Andrew J. Newman (Editor), Batool Ispahany (Translator) The present is the first English translation of a text in the Twelver Shi'i prophetic medical tradition. As such it will prove of both interest and importance to specialists and non-specialists alike. The former include those pursuing study of various aspects of Islamic history and civilization in general and especially students of the history of Islamic medicine. The latter include both those wishing greater awareness of the Twelver Shi'i faith and heritage in general, and those desirous of greater familiarity with practical dimensions of the faith in particular. For these audiences a fuller appreciation of this text is perhaps best achieved by some discussion of the place of the prophetic medical tradition within the context of the history of Islamic medicine. Western-language scholars have generally defined Islamic medicine as composed of two distinct and dichotomous traditions, pre-Islamic Galenic medicine and prophetic medicine. Galenic medicine is understood to have become available to Islamic medical writers and practitioners as Greek scientific texts were translated into Arabic, beginning especially in Baghdad in the early 3rd/9th century. Supported by the Abbasid caliphs and other wealthy benefactors, over the next two hundred years the translation movement made much of Greek philosophy and science available in Arabic, the lingua franca of Islamic civilization. The Imams of the Ahl al-Bayt, peace be upon them, were as concerned with treating the body as they were with treating the soul, and their regard for the soundness of the body was similar to their regard for the refinement of the soul. They were physicians of the soul and the body, and Muslims would consult them for their physical illnesses as they would for curing their spiritual sicknesses. This collection of Hadith is ample evidence of that. The Imams, peace be upon them, were not merely conveyors of religious regulations and legislation, but were leaders committed to caring for the Muslims, equally concerned-if such a term is cor-

rect-with the health of their bodies and their beliefs, such that they encouraged the learning of medicine (al-tibb). In his comprehensive statement on the divisions of knowledge, 'Ali b. Abu Talib (d. 40/661) Amir al-Mu'minin, peace be upon him, combined it [medicine] with the knowledge of jurisprudence (al-fiqh), saying: 'There are four kinds of knowledge: jurisprudence for religions, medicine for bodies, grammar for languages, and [study of] the stars to recognize the seasons. Much has been related from the Imams in collections [of Hadith] on medicine and preserving good health, just as there are more descriptions of various remedies related from them. Here for the reader are a small number of their sayings which are general rules for preserving health and physical well-being.

This book provides an understanding of pedagogy rooted in the developments of Islamic Education. It is the first book to explore this in the Madrasah context. The focus on Islamic pedagogy provides a way to explore knowledge, spirituality and education that is shaped by a universal approach to personalised learning.

Recent research has made a strong case for the view that Early Christian communities, sociologically considered, functioned as voluntary religious associations. This is similar to the practice of many other cultic associations in the Greco-Roman world of the first century CE. Building upon this new approach, along with a critical interpretation of all available sources, this book discusses the social and religio-historical background of the weekly gatherings of Christians and presents a fresh reconstruction of how the weekly gatherings originated and developed in both form and content. The topics studied here include the origins of the observance of Sunday as the weekly Christian feast-day, the shape and meaning of the weekly gatherings of the Christian communities, and the rise of customs such as preaching, praying, singing, and the reading of texts in these meetings.

During the last 140 years, Darwinism that rejects the fact of creation, and therefore the existence of Allah, has caused many people to abandon their faith or fall into doubt, Therefore, showing that this theory is a deception is a very important duty, which is strongly related to the religion.

In any theistic religion, the concept of God rests at the core of its beliefs, tenets and practices, and it determines what its adherents regard as admissible or otherwise. It shapes their attitudes towards others whom they label as "unbelievers." It inspires their perceptions, formulating how they conceive their role in life, how they should treat one another, what they should do when they sin or fall into error. It determines the extent of their humanity and provides them with a yardstick to measure that of others.

"Many recent works on Muslim societies have pointed to the development of 'de-culturalization' and 'purification' of Islamic practices. Instead, by exploring architectural designs, preaching activities, cultural celebrations, social participations and everyday practices, this book describes and analyses the formation and contestation of Chinese Muslim cultural identities in today's Indonesia. Chinese Muslim leaders strategically promote their unique identities by rearticulating their histories and cultivating ties with Muslims in China. Yet, their intentional mixing of Chineseness and Islam does not reflect all aspects of the multilayered and multifaceted identities of ordinary Chinese Muslims - there is not a single 'Chinese way of being Muslim' in Indonesia. Moreover, the assertion of Chinese identity and Islamic religiosity does not necessarily imply racial segregation and religious exclusion, but can act against them. The study thus helps us to understand better the cultural politics of Muslim and Chinese identities in Indonesia, and gives insights into the possibilities and limitations of ethnic and religious cosmopolitanism in contemporary societies." -- Provided by publisher.

Ronald Dworkin famously argued that fidelity in interpreting the Constitution as written calls for a fusion of constitutional law and moral philosophy. Barber and Fleming take up that call, arguing for a philosophic approach to constitutional interpretation. In doing so, they systematically critique the competing approaches - textualism, consensualism, originalism, structuralism, doctrinalism, minimalism, and pragmatism - that aim and claim to avoid a philosophic approach. Constitutional Interpretation: The Basic Questions illustrates that these approaches cannot avoid philosophic reflection and choice in interpreting the Constitution. Barber and Fleming contend that fidelity in constitutional interpretation requires a fusion of philosophic and other approaches, properly understood. Within such a fusion, interpreters would begin to think of text, consensus, intentions, structures, and doctrines not as alternatives to, but as sites of philosophic reflection about the best understanding of our constitutional commitments. Constitutional Interpretation: The Basic Questions, examines the fundamental inquiries that arise in interpreting constitutional law. In doing so, the authors survey the controversial and intriguing questions that have stirred constitutional debate in the United States for over

two centuries, such as: how and for what ends should governmental institutions and powers be arranged; what does the Constitution mean under general circumstances and how should it be interpreted during concrete controversies; and finally how do we decide what our constitution means and who ultimately decides its meaning.

Mengenal konsep Ilahiah atau Akidah Islamiyah merupakan fondasi utama bagi seorang muslim. Untuk itu, fondasi akidah ini perlu ditanamkan sejak usia dini atau kanak-kanak. Mengapa demikian? Karena masa kanak-kanak adalah masa yang paling jernih pemikirannya. Pada usia tersebut, hati, akal, maupun pemikirannya masih terbuka luas untuk memahami agamanya. Selain itu, anak merupakan titipan Allah Swt.. Sebagai generasi penerus maka orang tua, pendidik, keluarga, dan lingkungan masyarakat di sekitar adalah pihak yang mendapat amanah untuk membentuk anak menjadi seorang hamba yang bertaqwa. Buku ini merupakan pedoman bagi para orang tua maupun pendidik dalam mengenalkan konsep rukun iman kepada anak usia dini. Buku ini juga memberikan contoh-contoh metode yang dilakukan oleh Rasulullah Muhammad Saw. dalam mengajarkan keimanan kepada anak-anak. Pada bab terakhir, pembaca akan diberikan metode-metode menanamkan rukun iman kepada anak usia dini dalam berbagai bentuk lembaran kegiatan. Aktivitas tersebut untuk dilakukan di rumah maupun di sekolah, seperti kisah-kisah yang berhubungan dengan rukun iman atau lembar aktivitas pada setiap akhir pembahasannya. Penyusunan buku ini dibuat secara jelas dan praktis, dengan bahasa yang ringan dan mudah dicerna. Selain itu, dilengkapi juga dengan gambar atau foto sehingga memudahkan pembaca untuk cepat memahaminya.

This book focuses on the current clinical practice, outcome and the future development of Total Knee Arthroplasty (TKA) in surgical settings. A major objective of this work is to address "What is the optimal design and fixation of the implants we use for knee arthroplasty reconstruction? What are the gold standards? and, Can we do better?". In an attempt to throw light on these questions, the authors evaluate data from clinical studies and assess various factors which may influence the long term outcome of TKA. Many variables such as age, severity, implant design and surgical techniques for appropriate component placement and soft tissue balancing are explored in great detail by expert surgeons in the field. Total Knee Arthroplasty: Long Term Outcomes will be a useful resource for recently qualified surgeons in search of an introduction to this topic and for more experienced surgeons seeking an in-depth critical review of current practices in TKA.
