Surgical First Assistant. Surgical First Assistants are registered healthcare

professionals who provide continuous competent and dedicated assistance under the direct supervision of the operating surgeon throughout the procedure, whilst not performing any form of surgical intervention. Read a real-life case study, written by a Surgical First Assistant.

The U.S. Bureau of Labor defines surgical assistant as individuals that assist in operations, under the supervision of surgeons. May, in accordance with state laws, help surgeons to make incisions and close surgical sites, manipulate or remove tissues, implant surgical devices or drains, suction the surgical site, place catheters, clamp or cauterize vessels or tissue, and apply dressings to surgical site.

*Assisting at Surgical Operations by Comus Whalan* Although intended mainly for clinical-level medical students and junior doctors, other people who assist at surgical operations, including general practitioners, nurse assistants and surgical technologists, will also find it useful.

*Assisting at Surgical Operations*

Otorhinolaryngology-head and neck surgery (ORL-HNS) is a relatively new surgical subspecialty. It offers many challenges to the surgeon and his or her assistant because of the diversity of structures operated upon. These include the ear, nose, mouth, throat, larynx and neck. Thyroid and parathyroid surgery is being performed increasingly by head and neck surgeons, and facial plastic surgery is comprising a greater part of the ORL-HNS workload.
