## 6XT3BI - BRUNO BEST

---

Pain assessment begins with asking the patient if he has pain. If the answer is yes, perform a thorough pain assessment, including the intensity, quality, location, timing (onset, duration, frequency), symptoms, treatments (prescription and nonprescription), effects on function/daily activities, and what has and has not worked in the past. Merely asking the patient to rate his pain is not enough.

B. Ask the nurse educator to give an in-service about pain management. C. Perform a complete pain assessment and history on

the client. D. Have a conference with the nurses responsible for the care of this client. 2. Family members are encouraging your client to "tough it out" rather than run the risk of becoming addicted to narcotics. The ...
