After testing garden gloves for sensitivity, grip, and protection by peeling grapes, picking up oiled marbles, and grabbing raspberry canes, we found the Atlas Nitrile Garden Gloves are the best option. They're cheap (at \$4 per pair in a six pack) and aren't the best at any single task, but they're better all around than gloves that cost four times as much.

The composition of the biosphere is a fundamental question in biology, yet a global quantitative account of the biomass of each taxon is still lacking. We assemble a census of the biomass of all kingdoms of life. This analysis provides a holistic view of the composition of the biosphere and allows us to observe broad patterns over taxonomic categories, geographic locations, and trophic modes.
