If you ally need such a referred **BCG Law School Guide 2014 Pdf** book that will find the money for you worth, acquire the agreed best seller from us currently from several preferred authors. If you desire to humorous books, lots of novels, tale, jokes, and more fictions collections are in addition to launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every book collections BCG Law School Guide 2014 Pdf that we will certainly offer. It is not roughly the costs. Its about what you compulsion currently. This BCG Law School Guide 2014 Pdf, as one of the most effective sellers here will extremely be in the midst of the best options to review.

SSR30Q - ALINA CARDENAS

Whether you are a seasoned professional looking to explore new areas within the alternative investment arena or a new industry participant seeking to establish a solid understanding of alternative investments, *Alternative Investments: An Allocator's Approach*, Fourth Edition (CAIA Level II curriculum official text) is the best way to achieve these goals. In recent years, capital formation has shifted dramatically away from public markets as issuers pursue better financial and value alignment with ownership, less onerous and expensive regulatory requirements, market and information dislocation, and liberation from the short-term challenges that undergird the public capital markets. The careful and informed use of alternative investments in a diversified portfolio can reduce risk, lower volatility, and improve returns over the long-term, enhancing investors' ability to meet their investment outcomes. *Alternative Investments: An Allocator's Approach* (CAIA Level II curriculum official text) is a key resource that can be used to improve the sophistication of asset owners and those who work with them. This text comprises the curriculum, when combined with supplemental materials available at caia.org, for the CAIA Level II exam. "Over the course of my long career one tenet has held true, 'Continuing Education'. Since CalSTRS is a teachers' pension plan, it is no surprise that continuing education is a core attribute of our Investment Office culture. Overseeing one of the largest institutional pools of capital in the world requires a cohesive knowledge and understanding of both public and private market investments and strategies. We must understand how these opportunities might contribute to delivering on investment outcomes for our beneficiaries. *Alternative Investments: An Allocator's Approach* is the definitive core instruction manual for an institutional investor, and it puts you in the captain's chair of the asset owner." —Christopher J. Ailman, Chief Investment Officer, California State Teachers' Retirement System "Given their diversified cash flow streams and returns, private markets continue to be a growing fixture of patient, long-term portfolios. As such, the need to have proficiency across these sophisticated strategies, asset classes, and instruments is critical for today's capital allocator. As a proud CAIA charterholder, I have seen the practical benefits in building a strong private markets foundation, allowing me to better assist my clients." —Jayne Bok, CAIA, CFA, Head of Investments, Asia, Willis Tower Watson

This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

Over the past decade, businesses have faced relentless change on multiple dimensions, and the list of the world's largest companies has changed enormously. The keys to success are likely to be just as different for the new decade. Winning the '20s analyzes the new competitive environment that businesses face and outlines what will take to win in the 2020s. To stay ahead of the trends that are reshaping business, leaders need to rethink existing assumptions and retool their companies. Both traditional incumbents and younger digital giants will face very different but equally critical challenges in the 2020s—and would do well to learn from each other's strengths. This book discusses the new dimensions of competition that will affect corporate strategy in the next decade and how leaders can reinvent their organizations to be better suited for the new environment. The companies that succeed in the 2020s will look very different than they do today—they will have evolved their businesses to harness new technologies and reshaped their external relationships, organizations, and approaches accordingly. Winning the '20s will help business professionals as well as academics and students with an interest in strategy and leadership answer this critical question for the start of this decade: How should you prepare your company to avoid being left behind and emerge as a winner in a rapidly evolving business landscape?

DON'T LET YOUR WRITING HOLD YOU BACK. When you're fumbling for words and pressed for time, you might be tempted to dismiss good business writing as a luxury. But it's a skill you must cultivate to succeed: You'll lose time, money, and influence if your e-mails, proposals, and other important documents fail to win people over. The HBR Guide to Better Business Writing, by writing expert Bryan A. Garner, gives you the tools you need to express your ideas clearly and persuasively so clients, colleagues, stakeholders, and partners will get behind them. This book will help you:

- Push past writer's block
- Grab—and keep—readers' attention
- Earn credibility with tough audiences
- Trim the fat from your writing
- Strike the right tone
- Brush up on grammar, punctuation, and usage

Unified Theory of Business Strategy (UTBS) Successful businesses require strategic thinking, well-formulated goals and a clear approach to implementation. These are widely accepted as essential to business success. But describing these factors is not the same as making them happen. What corporate executives and business owners increasingly need is a practical, workable approach to business strategy that is supported by theory (but not drowned in it). That is where this book comes in. In *Unified Theory of Business Strategy*, Dr Rod Samimi combines theory and practice to give readers a solid understanding of how to formulate and implement a pragmatic business strategy. It includes a theoretical framework and applied interpretations, plus a detailed guide for compiling business plans. Using the Sentinel 9 multidisciplinary approach, the book configures an innovative way to look at business strategy.

Ever since 1989, the Faculty of Organizational Sciences, University of Belgrade, has been the host of SymOrg, an event that promotes scientific disciplines of organizing and managing a business. Traditionally, the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time, however, due the challenging situation regarding the COVID-19 pandemic, we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020, "Business and Artificial Intelligence", attracted researchers from different institutions, both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because "it significantly alters the way consumers, industries, or businesses operate." According to the European Commission document titled *Artificial Intelligence for Europe 2018*, AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia, after a public call, has selected and financed twelve AI projects. This year, more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation Smart Business Models and Processes Entrepreneurship, Innovation and Sustainable Development Smart Environment for Marketing and Communications Digital Human Resource Management Smart E-Business Quality 4.0 and International Standards Application of Artificial Intelligence in Project Management Digital and Lean Operations Management Transformation of Financial Services Methods and Applications of Data Science in Business and Society We are very grateful to our distinguished keynote speakers: Prof. Moshe Vardi, Rice University, USA, Prof. Blaž Zupan, University of Ljubljana, Slovenia, Prof. Vladan Devedžić, University of Belgrade, Serbia, Milica Đurić-Jovičić, PhD, Director, Science Fund of the Republic of Serbia, and Harri Ketamo, PhD, Founder & Chairman of HeadAI Ltd., Finland. Also, special thanks to Prof. Dragan Vukmirović, University of Belgrade, Serbia and Prof. Zoran Ševarac, University of Belgrade, Serbia for organizing workshops in fields of Data Science and Machine Learning and to Prof. Rade Matić, Belgrade Business and Arts Academy of Applied Studies and Milan Dobrota, PhD, CEO at Agremo, Serbia, for their valuable contribution in presenting Serbian experiences in the field of AI. The Faculty of Organizational Sciences would to express its gratitude to the Ministry of Education, Science and Technological Development and all the individuals who have supported and contributed to the organization of the Symposium. We are particularly grateful to the contributors and reviewers who made this issue possible. But above all, we are especially thankful to the authors and presenters for making the SymOrg 2020 a success!

The new edition of this internationally recognised text offers comprehensive guidance on the successful management of the child in the dental setting. Prepared by authors of international renown, the *Handbook of Paediatric Dentistry* presents a volume that takes the reader far beyond the technical skills that are needed to treat disorders of the childhood dentition and instead delivers a whole philosophy of integrative patient care. Richly illustrated and in full colour throughout, the *Handbook of Paediatric Dentistry* is written in a friendly 'how to' manner and contains useful 'pull out' boxes to act as useful aide-memoires. Exploring a variety of topics, the book includes discussion of child development, practical communication skills and advice on how to deal with behavioural problems. Clinical topics include the management of caries, fluoridation, restorative dentistry, pulp therapy, trauma management, oral medicine and pathology, dental anomalies, and the treatment of medically compromised children. Chapters also explore the use of orthodontics, the management of cleft lip and palate and speech, language and swallowing. The *Handbook of Paediatric Dentistry* has become an essential chairside and bedside companion for all practitioners caring for children and is suitable for undergraduate dental students, general dental practitioners, specialist paediatric dentists, orthodontists and paediatricians. Established as the foremost available comprehensive handbook on paediatric dentistry Prepared in an 'easy-to-digest' fashion – which allows for quick reference and easy reading Contains over 550 full colour line artworks, photographs and tables together with 'Clinical Hints' boxes to act as useful aide-memoires Sets out the essentials for managing conditions such as clefting disorders, haematological and endocrine disorders, congenital cardiac disease, disorders of metabolism, organ transplantation and cancer in children as well as more familiar presentations such as dental trauma, oral infections and caries Detailed appendices provide the reader with information that is often difficult to find and which may be overlooked Designed specifically to give all practitioners confidence when managing children Convenient handbook size ensures that the book can be easily referred to in the clinical setting Endorsed by the Australasian Academy of Paediatric Dentistry ~ Improved layout and completely new colour illustrations Expanded section on sedation and use of nitrous oxide Includes details from the most recent international guidelines Cases expanded to show 20 year follow-up Includes the latest research findings in orthodontics Fully updated section on clefting problems

This book compels the legal profession to question its current identity and to aspire to become a strategic partner for corporate executives, clients and stakeholders, transforming legal into a function that creates incremental value. It provides a uniquely broad range of forward-looking perspectives from several different key-players in the legal industry: in-house legal, law firms, LPO's, legal tech, HR, associations and academia. This publication is a platform for leading legal professionals that offers a new perspective on the accelerating transformation in legal. Combining expert contributions with editorial insights, it argues that the new legal function will shift from a paradigm of security to one of opportunity; that future corporate lawyers will no longer primarily be negotiators, litigators and administrators, but that instead they will be coaches, arbiters and intrapreneurs; that legal knowledge and data-based services will become a commodity; and that analytics and measurement will be key drivers of the future of the profession. A must-read for all legal professionals, this book sets the course for revitalizing the profession.

Beyond Great will give readers everywhere the strategies they need to navigate a daunting new era of technological, economic, and social change. Supported by years of research and hands-on consulting practice, it will present a comprehensive framework for building a high performing, adaptive, and socially responsible global company. The book begins by taking an incisive look at the disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the environment; and the emergence of borderless communities of digitally connected consumers. The authors then offer nine core strategies that will help businesses today address and exploit these forces. Through compelling stories from real companies that have used these strategies to make change, Beyond Great argues that leaders today must evince a new kind of flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules about what it takes to be "global," becoming shapeshifters adept at handling contradiction, multiplicity, and nuance. This book will show them how.

The nature of drug misuse and the delivery of health care have changed since the clinical guidelines were published in 1991. These clinical guidelines reflect these changes, as well as increased prominence of drug misuse on the national agenda. Governments make too little use of the skills and experience of citizens. New tools—what Beth Simone Noveck calls technologies of expertise—are making it possible to match citizen expertise to the demand for it in government. She offers a vision of participatory democracy rooted not in voting or crowdsourcing but in people's knowledge and know-how. This book examines volatility, uncertainty, complexity and ambiguity (VUCA) and addresses the need for broader knowledge and application of new concepts and frameworks to deal with unpredictable and rapid changing situations. The premises of VUCA can

shape all aspects of an organization. To cover all areas, the book is divided into six sections. Section 1 acts as an introduction to VUCA and complexity. It reviews ways to manage complexity, while providing examples for tools and approaches that can be applied. The main focus of Section 2 is on leadership, strategy and planning. The chapters in this section create new approaches to handle VUCA environments pertaining to these areas including using the Tetralemma logics, tools from systemic structural constellation (SySt) approach of psychotherapy and organizational development, to provide new ideas for the management of large strategic programs in organizations. Section 3 considers how marketing and sales are affected by VUCA, from social media's influence to customer value management. Operations and cost management are highlighted in Section 4. This section covers VUCA challenges within global supply chains and decision-oriented controlling. In Section 5 organizational structure and process management are showcased, while Section 6 is dedicated to addressing the effects of VUCA in IT, technology and data management. The VUCA forces present businesses with the need to move from linear modes of thought to problem solving with synthetic and simultaneous thinking. This book should help to provide some starting points and ideas to deal with the next era. It should not be understood as the end of the road, but as the beginning of a journey exploring and developing new concepts for a new way of management.

It is estimated that one third of the world's population is infected with *Mycobacterium tuberculosis* (the bacterium that causes tuberculosis (TB)), and that each year, about 9 million people develop TB, of whom about 2 million die. Of the 9 million annual TB cases, about 1 million (11%) occur in children (under 15 years of age). Of these childhood cases, 75% occur annually in 22 high-burden countries that together account for 80% of the world's estimated incident cases. In countries worldwide, the reported percentage of all TB cases occurring in children varies from 3% to more than 25%. The Stop TB Strategy, which builds on the DOTS strategy developed by the World Health Organization (WHO) and the International Union Against TB and Lung Disease, has a critical role in reducing the worldwide burden of disease and thus in protecting children from infection and disease. The management of children with TB should be in line with the Stop TB Strategy, taking into consideration the particular epidemiology and clinical presentation of TB in children. These consensus guidelines were produced to help the National Tuberculosis Programmes on the management of tuberculosis in children.

The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Health assessment is an ongoing process that evaluates the whole person as a physical, psychosocial and functional being, whether they are young or old, well or ill. This market-leading text presents health assessment, physical examination information and skills for health professionals who undertake these types of assessments. Health Assessment and Physical Examination is scaffolded from foundation to more advanced health assessment, following a body-systems approach and a 'head-to-toe' approach. It uses the ENAP (Examine-Normal-Abnormal-Pathophysiology) approach as a tool for students to collect useful information. An applied case study at the end of each chapter walks students through an example of an assessment. This comprehensive yet student-friendly text is noted for its high-quality case studies, pedagogical elements, and excellent student resources. Unique to this text are the advanced topics and 'Urgent findings', which highlights serious or life-threatening signs or critical assessment findings that need immediate attention.

The seventh edition of the Canadian Immunization Guide was developed by the National Advisory Committee on Immunization (NACI), with the support of the Immunization and Respiratory Infections Division, Public Health Agency of Canada, to provide updated information and recommendations on the use of vaccines in Canada. The Public Health Agency of Canada conducted a survey in 2004, which confirmed that the Canadian Immunization Guide is a very useful and reliable resource of information on immunization.

A Wall Street Journal Bestseller "...this guide provides readers with much more than just early careers advice; it can help everyone from interns to CEOs." — a Financial Times top title You've landed a job. Now what? No one tells you how to navigate your first day in a new role. No one tells you how to take ownership,

manage expectations, or handle workplace politics. No one tells you how to get promoted. The answers to these professional unknowns lie in the unspoken rules—the certain ways of doing things that managers expect but don't explain and that top performers do but don't realize. The problem is, these rules aren't taught in school. Instead, they get passed down over dinner or from mentor to mentee, making for an unlevel playing field, with the insiders getting ahead and the outsiders stumbling along through trial and error. Until now. In this practical guide, Gorick Ng, a first-generation college student and Harvard career adviser, demystifies the unspoken rules of work. Ng distills the wisdom he has gathered from over five hundred interviews with professionals across industries and job types about the biggest mistakes people make at work. Loaded with frameworks, checklists, and talking points, the book provides concrete strategies you can apply immediately to your own situation and will help you navigate inevitable questions, such as: How do I manage my time in the face of conflicting priorities? How do I build relationships when I'm working remotely? How do I ask for help without looking incompetent or lazy? The Unspoken Rules is the only book you need to perform your best, stand out from your peers, and set yourself up for a fulfilling career.

Think about strategy and sharpen judgment in an unpredictable environment Carl von Clausewitz is widely acknowledged as one of the most important of the major strategic theorists; he's been read by Eisenhower, Kissinger, Patton, Chairman Mao, and numerous other leaders. In Clausewitz on Strategy, the Boston Consulting Group's Strategy Institute has excerpted those passages most relevant to business strategy from Clausewitz's classic text *On War*, the most general, applicable, and enduring work of strategy in the modern West and a source of insight into the nature of conflict, whether on the battlefield or in the boardroom. This book offers Clausewitz's framework for self-education—a way to train the reader's thinking. Clausewitz speaks the mind of the executive, revealing logic that those interested in strategic thinking and practice will find invaluable. He presents unique ideas, such as the idea that friction—unexpected interference—is an intrinsic part of strategy. The Boston Consulting Group is one of the world's leading management consulting firms whose clients include many of the world's industry leaders. Tihon von Ghyczy (Charlottesville, VA) has been a faculty member and Director of Business Projects at the Darden School of Business since 1996. While with The Boston Consulting Group, he assumed responsibility for the practice groups in manufacturing/time-based competition and high technology. He has published numerous articles and books on vision and strategy. Bolko von Oetinger (Munich, Germany) is a Senior Vice President of BCG. Christopher Bassford (Washington, DC) is presently a Professor of Strategy at the National War College in Washington, DC, and the author of several books, including Clausewitz in English: The Reception of Clausewitz in Britain and America, 1815-1945.

This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

New tools for managing complexity Does your organization manage complexity by making things more complicated? If so, you are not alone. According to The Boston Consulting Group's fascinating Complexity Index, business complexity has increased six-fold during the past sixty years. And, all the while, organizational complicatedness—that is, the number of structures, processes, committees, decision-making forums, and systems—has increased by a whopping factor of thirty-five. In their attempt to respond to the increasingly complex performance requirements they face, company leaders have created an organizational labyrinth that makes it more and more difficult to improve productivity and to pursue innovation. It also disengages and demotivates the workforce. Clearly it's time for leaders to stop trying to manage complexity with their traditional tools and instead better leverage employees' intelligence. This book shows you how and explains the implications for designing and leading organizations. The way to manage complexity, the authors argue, is neither with the hard solutions of another era nor with the soft solutions—such as team building and feel-good "people initiatives"—that often follow in their wake. Based on social sciences (notably economics, game theory, and organizational sociology) and The Boston Consulting Group's work with more than five hundred companies in more than forty countries and in various industries, authors Yves Morieux and Peter Tollman recommend six simple rules to manage complexity without getting complicated. Showing why the rules work and how to put them into practice, Morieux and Tollman give managers a much-needed tool to reinvigorate people in the face of seemingly endless complexity. Included are detailed examples from companies that have achieved a multiplicative effect on performance by using them. It's time to manage com-

plexity better. Employ these six simple rules to foster autonomy and cooperation and to effectively handle business complexity. As a result, you will improve productivity, innovate more, reengage your workforce, and seize opportunities to create competitive advantage.

Viviamo un'epoca di cambiamento continuo, caratterizzata da innovazioni tecnologiche che incidono in maniera profonda e irreversibile sulla vita quotidiana di tutti. Il progresso tecnologico appare infatti così capace di sconvolgere i parametri dell'individuo e della collettività da rovesciare l'interrogativo su cosa l'uomo possa fare delle macchine in cosa le macchine possano fare dell'uomo. In questo libro il lettore può condividere uno sguardo curioso e partecipare alle trasformazioni in atto, cercando di arrivare a una sintesi di pensiero, di ottenere nuove chiavi interpretative. I molti temi trattati rappresentano i principali macrotrend socio-economici e socio-politici del momento: dalle nuove tecnologie alla sicurezza internazionale, dalla quarta rivoluzione industriale al nuovo paradigma economico della sharing economy, dai colossi sovranazionali della new economy alle trasformazioni del mercato del lavoro e alle crescenti disuguaglianze sociali. Ecco allora uno spunto di riflessione, una provocazione intellettuale che, da un lato, si propone di stimolare il confronto e di aggregare le idee e, dall'altro lato, rappresenta il tentativo di coinvolgere i leader presenti e futuri invitandoli ad assumersi l'arduo compito di incentivare, far crescere ed ampliare il dibattito pubblico intorno ai temi fondanti dell'oggi, e di individuare percorsi possibili a servizio delle scelte politiche, aziendali e personali dei prossimi anni. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial} p.p2 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial; min-height: 11.0px} p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial} p.p2 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial; min-height: 11.0px}

The legendary Silicon Valley entrepreneur examines how both business and government organizations can harness the power of disruptive technologies. Tom Siebel, the billionaire technologist and founder of Siebel Systems, discusses how four technologies—elastic cloud computing, big data, artificial intelligence, and the internet of things—are fundamentally changing how business and government will operate in the 21st century. While this profound and fast-moving transformation can appear daunting to some, Siebel shows how organizations can not only survive, but thrive in the new digital landscape. In this authoritative yet accessible book, Siebel guides readers through the technologies driving digital transformation, and demonstrates how they can strategically exploit their powerful capabilities. He shows how leading enterprises such as Enel, 3M, Royal Dutch Shell, the U.S. Department of Defense, and others are applying AI and IoT with stunning results.

Forecasts how rapidly developing nations threaten America's dominance as a major economic power and offers recommendations for how America can prepare for and compete in a new world economy.

Rocket tells the story of how sixteen remarkable business leaders created great brands. Leslie Wexner tells you how he turned a two-store chain into a \$6.5 billion worldwide brand called Victoria Secret, and Howard Schultz shares how he took his passion for a little coffee shop in Seattle and grew it into a 22,000-store chain, just to name two. Every story is connected to a "how-to" lesson, and by the end, you'll have what you need to turn your best customers into apostles, cravers, and brand ambassadors. A must-have guide for everyone who wants to grow their business faster than a competitor, this authentic, vibrant, and engaging book brings you the latest practical techniques for knowing your customers' desires and behaviors in order to deliver intimately rewarding experiences every time they shop—including knowing what they need before they do. Included is a "self critique" to identify where you are currently before you transform your career and company by mastering how to: • Create a demand-space map and predict how big a share of a demand space you can win with the proper mix of emotional and functional benefits satisfying the attributes of that space • Determine a strategic direction for where to place investment bets, identify which brands are best suited to win, and which are most responsive to investment • Deliver all the core benefits of a particular demand space in your product—from packaging, shelving, pricing, and promotion to message development, store operations, delivery, and employee engagement • Maintain a long-term vision to continuously quantify and modify for ongoing improvement, while using your successes to convert more champions along the way With Rocket, you can rise into a cycle of renewal, energy, and power that can launch startups to phenomenal success and turn around the fate of multinational corporations.

Based on the experience of many countries in the WHO European Region and the advice of experts, this guide outlines some of the steps prison systems should take to reduce the public health risks from compulsory detention in often unhealthy situations, to care for prisoners in need and to promote the health of prisoners and prison staff. This requires that everyone working in prisons understand how imprisonment affects health, what prisoners' health needs are, and how evidence-based health services can be provided for everyone needing treatment, care and prevention in prison.

Other essential elements are being aware of and accepting internationally recommended standards for prison health; providing professional care with the same adherence to professional ethics as in other health services; and, while seeing individual needs as the central feature of the care provided, promoting a whole-prison approach to care and promoting the health and well-being of people in custody.

A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted reality The Encore: How to repeat the process—again and again. Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. The Imagination Machine is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your disposal.

This new handbook, written in English, illustrates the current state as well as future developments of the digital transformation on the legal market. It thereby gives an overview of the legal tech field worldwide as well as examples of its application in order to show how and to which extent automatized workflows, artificial intelligence (AI), automatized generation of documents and contract management in law firms and companies are in use even today. This book, in its first part originally written for Germany and German speaking countries, now also exemplifies the development of legal tech in numerous jurisdictions, including the USA, Europe, Russia, China and Australia. A third section is devoted to future developments, including smart contracts, block chain, AI, and publishers as legal service providers. More than 50 authors from all over the globe have contributed to this unique book. Particularly helpful: up-to-date examples show how legal tech is already in use in various fields of application in the context of jurisprudence.

Infectious diseases are the leading cause of death globally, partic-

ularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

The overarching contribution of this book is a review and assessment of the current and future impacts of globalization on the world's forests. The work has been developed by the "Resources for the Future" Task Force for the International Union of Forest Research Organizations (IUFRO). Four key themes are addressed: the effect of globalization on forests (including future trade flows); plantations as the primary source of forest products and its consequences, including plant breeding and forest health; the effect of new products such as bio-products and markets on forests; and the emergence of forest ecosystem services and their impact on the landscape and human communities. These four themes are examined in detail to map out the impacts of these trends for forests throughout the world and at multiple scales, and how forest research needs to be adapted to address these trends. Overall, the volume provides a major synthesis of current thinking and knowledge on the topic for advanced students, as well as policy-makers and professionals in the forest sector.

"Managing Internationalisation" explains the process of internationalising any kind of organisation from a management perspective. Based on the renowned EFQM Excellence Model, all issues with special relevance for international activities are explained and traced back to recent scientific research and good management practise. The book is meant for practitioners and students alike. For a better understanding, extensive illustrations, examples, exercises and recommendations for case studies enrich the text. Dieses Buch erklärt den Prozess der Internationalisierung von Organisationen aus der Sicht des Managements. Auf der Basis des EFQM-Modells für Business Excellence (Qualitätsmanagement) werden alle für internationale Aktivitäten relevanten Themen erläutert. Das Buch ist für Praktiker und Studierende gleichermaßen geeignet. Mit praxisnahen Übungen und Fallstudien.

Winner of the Paediatrics category at the BMA Book Awards 2015 About to start a paediatrics rotation? Working with children for the first time? Thinking about a career in paediatrics? The Hands-on Guide to Practical Paediatrics is the ultimate practical guide for medical students encountering paediatrics for the first time, junior doctors thinking about working with children, and new paediatric trainees. It's full of vital information on practical procedures, prescribing for young patients, and communicating with children and young people, as well as guidance on the paediatric training pro-

gramme and paediatrics as a career. Full of clinical tips, and covering key information on developmental stages, common paediatric emergencies and ethical dilemmas, and child protection, The Hands-on Guide to Practical Paediatrics is also supported by on-line resources including practice prescribing scenarios and video content at www.wileyhandsonguides.com/paediatrics Take the stress out of paediatrics with The Hands-on Guide!

Risk management of medicines is a wide and rapidly evolving concept and practice, following a medicine throughout its lifecycle, from first administration in humans through clinical studies and then marketing in the patient population at large. Previous reports from CIOMS I - VIII provided practical guidance in some essential components of risk management such as terminology and reporting of adverse drug reactions, management of safety information from clinical trials, and safety signal detection. Beyond the detection, identification, and characterization of risk, "risk minimization" is used as an umbrella term for the prevention or mitigation of an undesirable outcome. Risk management always includes tools for "routine risk minimization" such as product information, the format depending on the jurisdiction, to inform the patient and the prescriber, all of which serve to prevent or mitigate adverse effects. Until this current CIOMS IX document, limited guidance has been available on how to determine which risks need "additional risk minimization," select the appropriate tools, apply and implement such tools globally and locally, and measure if they are effective and valuable. Included in the report is a CIOMS framework for the evaluation of effectiveness of risk minimization, a discussion of future trends and developments, an annex specifically addressing vaccines, and examples from real life.

The Sustainability Assessment of Food and Agriculture Systems (SAFA) Guidelines were developed for assessing the impact of food and agriculture operations on the environment and people. The guiding vision of SAFA is that food and agriculture systems worldwide are characterized by all four dimensions of sustainability: good governance, environmental integrity, economic resilience and social well-being.

Wealth manager and host of The Fiscal Feminist podcast Kimberlee Davis taps her 25 years' experience to teach women how to take charge of their money and control their financial destiny. Women are more educated and successful than ever, but they still tend to stand on the sidelines when it comes to their money, according to financial experts. At the same time, women live longer, earn less, and often have to work harder than men to offset years spent out of the workforce raising children. Adding to this perfect storm, women have suffered disproportionately in the post-pandemic downturn. The Fiscal Feminist is a call to action for women to reverse these trends by increasing their financial literacy and—ultimately—controlling their destiny. Author Kimberlee Davis, a wealth manager and host of The Fiscal Feminist podcast, taps her 25 years' experience to educate women of all ages and economic strata about how to independently achieve—and maintain—financial health on their own terms.
