This publication is the revised edition of the Cued Articulation range. The previously separate titles Cued Articulation and Cued Vowels are now combined and updated, with this edition covering consonants, vowels, demonstrative images, and full color coding throughout. The book was originally devised to help severely speech and language handicapped children to see a sound and hear a letter by the use of easy and logical hand cues. The Cued Articulation system has, over the last three decades, proved to be an invaluable teaching tool. Its potential and practicality is widespread and utilized by speech pathologists, speech and language therapists, remedial and reading recovery teachers who find the approach helpful in showing phoneme-grapheme relationships, and primary teachers who use it in the classroom to teach children the sounds of speech. Teachers who teach correct pronunciation to those who have English as a second language also find it extremely useful, as do teachers of the hearing impaired who want their students to see the sounds they cannot hear. Also available to compliment the book is an instructional, interactive DVD (# 9780864319180), which includes demonstrations of the cues and sounds.

This book is an authoritative account of multilingualism in the present era, a phenomenon affecting a vast number of communities, thousands of languages and millions of language users. The book's focus is specifically on the knowledge and use of multiple languages, but its treatment of the topic is very wide-ranging. It deals with both bilingualism and polyglottism, at the level of the individual speaker as well as at the societal level. The volume addresses not only linguistic facets of multilingualism but also multilingualism's cultural, sociological, educational, and psychological dimensions, moving from classic perspectives to recent and emerging directions of interest. The book's extensive coverage takes in topics ranging from the 'new linguistic dispensation' in our globalized world to child development in multilingual environments, from the classification of multilingual groupings to characteristics of the multilingual mind. This breadth makes Multilingualism an ideal advanced textbook for undergraduate and postgraduate students in the areas of linguistics, education and the social sciences.

Language is central to our existence and it happens to be the most sophisticated product of the human mind. It is inconceivable to think of ourselves, our societies, our ideas, cultures or identities without language. It is the primary means of socialization, and whatever we know is a result of it. It is the primary medium of construction and dissemination of knowledge, and structures our thought processes in important ways that constitute our identity. In very complex ways, it interacts with the social, political

and economic power structures that remain significant in defining the identities of individuals and societies. The essays in this volume create an awareness and understanding about the role of linguistic context in negotiating identity. The book explains identity and the complex relations between language and several aspects of our society. It explores identity through text and context, and will serve to trigger a novel discourse around the centrality of identity in contemporary society.

This volume approaches contemporary multilingualism as a new linguistic dispensation, in urgent need of research-led, reflective scrutiny. The book addresses the emergent global and local patterns of multilingual use and acquisition across the world and explores the major trends that characterize today's multilingualism. It is divided into three parts on the basis of the broad themes: education (including multilingual learning in its general, theoretical aspects), sociolinguistic dimensions and language policy. The book's fifteen chapters, written by renowned international experts, discuss a range of issues relating to the quintessential and unique properties of multilingual situations— issues relevant to the challenges faced in different ways by researcher and practitioners alike. All the contributions share a focus on currently operative patterns of interaction between contexts, events and processes.

In this process, all these languages interacted with the native languages of India and exchanged sounds, words, sentences, idioms and expressions, sometimes even giving birth to new languages.
