Oracle Berkeley DB Guide Installation and Build 11g Release 2 When installing Berkeley DB on filesystems shared by machines of different architectures, please note that although Berkeley DB include files are installed based on the value of \$(prefix), rather than \$(exec_prefix), the Berkeley DB include files are not always architecture independent. To move the entire installation tree to somewhere besides /usr/local, change the value of prefix.

Berkeley DB Reference Guide: Installing Berkeley DB Once enabled, the Berkeley DB shared library for Tcl is automatically installed as part of the standard installation process. However, if you want to be able to dynamically load it as a Tcl package

into your script, there are several steps that must be performed: Run the Tcl shell in the install directory.

~~Berkeley DB installation— Oracle Community~~

The Oracle Berkeley DB family of open source, embeddable databases provides developers with fast, reliable, local persistence with zero administration. Often deployed as an 'edge' database, Oracle Berkeley DB provides very high performance, reliability, scalability, and availability for application use cases that do not require SQL

~~Oracle Berkeley DB~~
 Complete support for Oracle Berkeley DB Base Replication. Please see the documents in the docs directory of the source distribution or at the website for more details

on the types and methods provided. The goal is to mirror most of the real Oracle Berkeley DB API so fall back to the Oracle Berkeley DB documentation as appropriate.

~~berkeleydb—PyPI~~

Berkeley DB (BDB) is a software library intended to provide a high-performance embedded database for key/value data. Berkeley DB is written in C with API bindings for C++, C#, Java, Perl, PHP, Python, Ruby, Smalltalk, Tcl, and many other programming languages. BDB stores arbitrary key/data pairs as byte arrays, and supports multiple data items for a single key.

~~Berkeley DB—Wikipedia~~

Install the new version of the application by relinking or installing a new version of the Berkeley DB shared library. Restart the application. Otherwise, if the application does not have a Berkeley DB transactional environment, the application may be installed in the field using the following steps: Shut down the old version of the application.
