What happens to Chris and Ruthie comes naturally to teenagers: they fall in love, obsessively. But it isn't natural that their love can only survive in secrecy, being against the wishes, even beyond the imagination, of their parents. And above all being illegal. At home Chris half loves, half fears his taciturn father, who never speaks of his important work for the Government. As Chris's world opens up he learns about his father's job as head of the province's Race Classification Office, whose every decision can make or break somebody's life in the 1970s South Africa. In this moving rites-of-passage story set in extraordinary circumstances, a coloured girl and white boy head for devastating consequences as their vulnerable lives hurtle down a collision course with the pitiless laws of society and the implacable resolve of his father.

Witnessing death. Surviving abuse. This is the true story of former model Danielle Miller. In her own words. On her way to uncovering hidden truths about the world. She found herself in some pretty tumultuous relationships. Falling in love with two men at the same time certainly wasn't part of the plan! Her world was further turned upside down, when she experienced strange happenings that confirmed her longstanding belief in God; but if God is real. Then the devil must be too..right? A WORD FROM THE AUTHOR: This is my story minus the filters and soft focus. Just the unphoto-shopped truth. I felt pushed into a life in front of the camera for reasons you'll find out in my book. I was on my way to becoming famous and spiralling out of control. When I chose to walk away from that life. To pursue a deeper, more meaningful path.

Ken Fisher is founder and CEO of Fisher Investments, an independent money management firm managing over \$35 billion (as of Dec. 31/09) for individuals and institutions. And, Fisher has written the monthly "Portfolio Strategy" column for Forbes magazine for the last twenty-five years—since 1984—making him, so far, the fourth longest-running columnist in the magazine's history. During this time, he's seen everything from the stock market crash of 1987 and the great bull markets of the 1980s and 1990s to the Tech bubble of 2000 and the global market meltdown of 2008. Now, with *The Making of a Market Guru*, you'll gain an insightful look at Fisher's prolific career over the years and discover the high-profile market calls he's made so far in these monthly columns. At times engaging and timely, at others revealing and informative, this book is a sweeping look at a recent and eventful slice of stock market history. You'll read about what's changed, but you'll be more amazed by what hasn't. And you'll see investing wisdom that still applies, now and for the foreseeable future, from a quarter-century of Fisher's concise and witty market wisdom. Preceding Fisher's columns for each year are a few pages of commentary—putting them in historic context, pointing out areas that are still salient, and others where Fisher's perspective has changed over the years—highlighting key points that deserve extra attention. Chapter by chapter, this book offers practical investment advice from a leading market voice, while: Looking at Fisher's market analysis over the years and providing an industry insider's view of major, and not-so-major, market events Examining how Fisher called three of the last four bear markets Showing that what many commonly think impacts markets doesn't—and some very surprising things that do impact markets that few are aware of. And much more The more things change, the more they stay the same—at least when it comes to investing. And seeing history through the eyes of a market guru can help improve your overall investment endeavors today. If you take the time to read this unique, historic compilation, you'll be taking your first steps to understanding how to become your own market guru.

Isabella Walsh was alone in the world. Working full-time and attending the local college, her life was difficult but happy. Until the night she witnessed a police officer execute her boss, forcing her to

leave the only place she called home in order to save her own life. Finally, exhausted from months of running, Isabella settles in a small town, but soon realizes the men searching for her have found her once again. Gathering what strength she has left, she fights back, only to collapse in a wooded area, cold, exhausted, and alone. Ethan Shay, a former member of the army's elite Special Forces unit, is happy with the quiet life he has chosen to lead. Finding a broken and bleeding unconscious woman was not something he anticipated, but finding her in the woods and knowing that someone had badly beaten her brings out his natural instinct to protect. Shocked at her vehemence that he not call the police, Ethan takes her home to give her time to recover. When she finally tells him her story, it quickly becomes clear that it will take more than just his resources to help her. As they work together to uncover the mystery surrounding Isabella, they learn that the political ramifications of what she witnessed were only the beginning of what was truly happening. To stay alive, Isabella and Ethan will have to figure out how deeply her secrets go and whom, if anyone, they can trust. The decisions they make going forward could be costly, including whether or not they should stay together and forge a relationship they both desperately want. It's only when the bullets start to fly that their true relationship is put to the test.

The Best Time to Do Everything is really just that—a guide to the best time to do everything in life. From buying shoes to cleaning a murder scene, each entry is built around the well-informed advice of an expert in that particular field: Donald Trump on the best time to haggle, Johnny Ramone on the best time to learn to play guitar, Bill Maher on the best time for a political conversation, the Car Talk guys on the best time to repair your car. Not all of the advice comes from celebrities, but all of it does come from people who know their stuff. Incredibly useful (best time to buy life insurance, best time to look for a job, best time to purge and organize), entertaining (best time to start a high-fashion modeling career, best time to approach a celebrity, best time to cheat on your diet), and outrageous (best time to get punched in the face, best time for a coup, best time to have sex with 209 strangers), The Best Time to Do Everything is educational, practical, and wholly addictive. How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same This book is called How To Write Anything, and I confess there is some ego involved in the title. But then I've been a professional writer for over 40 years. As one of Canada's most successful writers and authors, I have written hard news articles, soft news and feature articles, advertising and promotional copy, media releases, reports and proposals, case studies, research papers, email messages, website content, tweets, blog posts, and other online content. I have also written over 20 books on business, promotional and online writing and other topics, such as writing articles, memoir writing and living with Multiple Sclerosis, a disease that I have, but one that has not prevented me from writing or training. I've also written a collection of short stories, poetry, and a couple of plays. So while I haven't written everything, I've written many things. The fact is that you can't read this book and go forth and write anything if you are not familiar with the format or structure of the document that you want to write—be it non-fiction or fiction. For instance, if you want to write a report, you do so using the methods in this book. However, you have to know how to structure reports. The same is applicable to email, social media content, articles, promotional content, case studies, reports, white papers, PowerPoint presentations, speeches, website content, short stories or novels. So some of you reading this book might still have some learning to do. However, I suspect most of you know the structure of the documents you want to produce and you will

be able to immediately apply the methods outlined in the book to writing any document that you need to write.

The enduring legacy of a legendary investor Called the "greatest stock picker of the century" by Money magazine, legendary fund manager Sir John Templeton is remembered as one of the world's foremost investors, known for his pioneering insights and phenomenal investment performance over a professional career which spanned more than half a century. Templeton's Way with Money provides a unique, professional 21st century appraisal of what made this formidable investor the success he was—and why his methods remain as valid today as they were during his long and successful lifetime. Written by two investment experts, one of whom worked closely with Sir John for ten years, and drawing on previously unpublished documents, the book explains in detail how John Templeton's simple but effective investment philosophy of riding out the ups and downs of the market cycle continues to be as relevant as ever for professional and private investors alike. Key features include: A fresh and detailed reappraisal, drawing on a number of previously unpublished documents, of the philosophy which Templeton applied to the two phases of his investment career—first as an investment counsel, and latterly as the most successful global fund manager of his generation A detailed and original study of the performance of the Templeton Growth Fund, demonstrating in detail how Templeton achieved the Holy Grail of investment—above average returns with below average risk First hand accounts from former colleagues of their experience in working with Templeton—including those of author Alasdair Nairn's ten-year career working with and for the investment management organization that was Templeton's life work Proprietary and original research which explains why Templeton's seemingly simple investment philosophy is sure to produce exceptional returns if implemented effectively Current market conditions make Templeton's contrarian investment method of profiting from pessimism particularly relevant today, and this book a must-read for anyone working with investments.

This is a story about one man's forty-year struggle to leave what he thought would be a temporary job in Banking to follow his lifelong dream of becoming an artist. Away from the bank, he took what time he could afford to work toward that goal. After some oil painting lessons, his skills improved. Working in his garage usually at night, he started giving away and selling some of his paintings to friends. Since Banking and Art are quite opposite, he felt as though he was leading a sort of double life. After his skills improved, he attempted to find ways to leave banking, including a wild and crazy decision to open a gallery in Carmel, California. Still living his double life, he hoped the gallery would eventually replace his bank job. It did not. When a benefactor offered to back him financially, he happily left banking, only to reluctantly return to banking when his benefactor could not continue funding. Back to his double life again, he continued painting and sold his work in several galleries. This story takes the reader on many rocky paths, some of which were dead ends, ultimately to one as a full time Artist. When illness and death took his wife and daughter, his faith was sorely tested, however he never gave up painting. After remarrying, he and his wife returned to the Monterey Bay where the dream is still alive.
