Biocentrism

Biocentrism, also referred to as the biocentric universe, is a theory proposed by renowned scientist, Robert Lanza. This theory explains that life and biology are the central pieces to being, reality and the cosmos. It explains how life creates the universe rather than the other way around. Biocentrism builds upon the ideas of quantum physics.

...

'Biocentrism': How life creates the universe The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics.

Robert Lanza (born 11 February 1956) is an American medical doctor, scientist and philosopher. He is currently Head of Astellas Global Regenerative Medicine, and is Chief Scientific Officer of the Astellas Institute for Regenerative Medicine and Adjunct Professor at Wake Forest University School of Medicine

BEYOND BIOCENTRISM / Robert Lanza, M.D.

Website of Dr. Robert Lanza, M.D. From visionary physicist Scott Tyson's new book "The Unobservable Universe" "I downloaded a digital copy of [biocentrism] in the privacy of my home, where no one could observe my buying or reading such a "New Agey" sort of cosmology book.

Biocentrism completes this shift in worldview, turning the planet upside down again with the revolutionary view that life creates the universe instead of the other way around. In this paradigm, life is not an accidental byproduct of the laws of physics.

Biocentrism (from Greek βίος bios, "life" and κέντρον kentrion, "center"), in a political and ecological sense, as well as literally, is an ethical point of view that extends inherent value to all living things. It is an understanding of how the earth works, particularly as it relates to biodiversity.
