Questions are the root cause of success. The more new & authentic questions you will have, the more new & authentic knowledge you will have. Considering this fact, the Department of Education in Science & Mathematics (DESM) with an aim to improve the quality of teaching/learning process in schools has made an attempt to develop resource books of Exemplar Problems in different subjects at secondary and higher-secondary stage. These specialized resource books named NCERT Exemplars are not meant to serve merely as question banks for examinations but are primarily meant to discourage rote learning. The first and the only books of its kind by Arihant Publications is an attempt at providing comprehensive guide to NCERT Exemplar Problems-Solutions for Class 6th to 12th. The present book for Class 8th Science contains different types of questions of varying difficulty level. Also detailed explanation for comprehensive understanding has been given for all objective and subjective problems. The present book has been divided into 18 chapters namely Crop Production & Management, Microorganisms: Friend & Foe, Synthetic Fibres & Plastics, Materials: Metals & Non-Metals, Coal & Petroleum, Combustion & Flame, Conservation of Plants & Animals, Cell: Structure & Functions, Reproduction in Animals, Reaching the Age of Adolescence, Force & Pressure, Friction, Sound, Chemical Effects of Electric Current, Some Natural Phenomena, Light, Stars & Solar System and Pollution of Air & Water. The problems provided in the book will test comprehension, information recall, analytical thinking and problem-solving ability, creativity and speculative ability. Detailed explanation has been provided for all objective and subjective problems covered in the book. The book will also be highly useful for school examinations and to build foundation for entrance examinations. As the book contains detailed and comprehensive solutions for NCERT Exemplar problems for Class 8th Science, it for sure

will act as a catalyst in helping discourage rote learning.

The rate of extinction of biological species is greater today than at any time in the last 65 million years. Some predict that if this rate continues, two-thirds of all living species will disappear during the next century. Because reaching consensus on specific courses of action involves complex issues, any adequate response to this impending crisis must include coverage of many areas of inquiry and understanding. Protection of Global Biodiversity features essays by distinguished international experts who communicate with each other across disciplinary boundaries to address the challenge of formulating policies to protect biodiversity. Although the global community has recently adopted a Convention of Biological Diversity, the agreement sets forth only abstract goals. Contributors to this volume advance the Convention's initial steps by providing workable solutions that can be implemented regionally, nationally, and locally. The contributors--including natural, social, and political scientists; economists; lawyers; and environmentalists; and decisionmakers in business, agriculture, and government--have united to create a common discourse and to evaluate and propose strategies for halting this alarming loss of biodiversity. In recognizing the diverse aspects of this task--scientific, economic, institutional, moral, and legal--this book presents a new picture of emerging action. Contributors. S. James Anaya, Gregory Benford, Graciela Chichilnisky, S. Todd Crider, Yvonne Cripps, Robert T. Fraley, Anil K. Gupta, Lakshman D. Guruswamy, G. M. Heal, Brent Hendricks, Robert B. Horsch, Laura L. Biodiversity is the variety of life in a given range. Today, the world is under tremendous threat of unprecedented loss of biodiversity. Issues like global warming, environmental pollution, recurrent natural calamities and human population rise are of major concern for scientists all over the world. The second edition of the book covers a complete range of the topics pertaining to the subject such as meaning of biodiversity, its history, importance of species diversity, systematics, determination of status of bioresources, pattern of distribution of global species, genetic diversity and ecosystem diversity. It also elaborates on various drivers that lead to biodiversity loss and its impact on global climate. Moreover, the topics on biopiracy, related laws and policies, and the importance of indigenous knowledge of several communities are also described in the text. The use of biotechnology-based methods and various measures to preserve natural resources and conserve biodiversity is the highlight of the text. Moreover, the book provides a detailed account of the conservation measures of biodiversity, especially those implemented by the government. This book is primarily designed for the undergraduate and postgraduate students of Environmental Science, Zoology and Botany. Besides, it will also be useful for postgraduate diploma or other professional courses in Environmental Science and also for the researchers. NEW TO THE SECOND EDITION • 'Project Tiger' and 'Project Elephant' are introduced in the chapter on Conservation Practice. • Various sections have been revised and updated throughout the book. • A few figures have been added and many others have been replaced for better illustration. KEY FEATURES • Explains the contemporary topics such as green accounting and sustainable management of natural resources in an easy-to-understand manner. • Incorporates a number of photographs, flow

charts, diagrams and tables. • Provides chapter-end review questions to help students check their understanding of the subject. • Includes MCQs (with answers given at the end of the book). • Gives an elaborate glossary of technical terms to acquaint the students with the related terminologies.

The present series LEARNING ELEMENTARY SCIENCE for Classes 6-8 follows the concept of "Learning without burden" as a guiding principle. Science has to be understood as a lively and growing body of knowledge. The children have to learn the dynamism of science by observing things closely, recording observations, and when drawing inferences from what they observe. Observations are to be made by performing such activities which can be easily performed by the children, often without costly equipment, and even at their homes. When science is learned in this manner, the children would learn the ways of nature and start appreciating it. The salient features of this series are : □ It is in strict accordance with the latest N.C.E.R.T. syllabus. □ It encourages the learning of science through activities. The activities provide hands-on experience to the learners. All the activities and experiments are class-tested. □ The language used is simple and lucid. □ It explains the laws and principles of science in a clear and concise way. □ The series has updated information along with interesting facts in the form of 'Did you know?' □ Exercises and Activities / Projects are given at the end of each chapter. Exercises contain Multiple Choice Questions, Fill in the Blanks, True and False, Match the Statements, Short Answer Type Questions, etc. Activity / The project contains Activities, Projects, Charts, Models, Class Response, Visit, Quiz, the topic for Seminar/Debate. The assessments develop skills of comprehension of concepts, enhance knowledge and application of what is learned. □ Life skills relevant to the chapters are given at the end of the

chapters. □ Two Model Test Papers are given at appropriate places for Half Yearly Examination and Yearly Examination. □ Four Periodic Test Papers are given at appropriate places for Periodic Assessments. □ Learning Elementary Science becomes a joyful experience with a number of clearly labeled illustrations and learner-friendly simple language.
