Description. Zar's Biostatistical Analysis, Fifth Edition, is the ideal textbook for graduate and undergraduate students seeking practical coverage of statistical analy-

sis methods used by researchers to collect, summarize, analyze and draw conclusions from biological research. The latest edition of this best-selling textbook is both comprehensive and easy to read.

Introductory statistics texts have been noted to have inaccuracies in the tables of critical values for Spearman's correlation. Even the best texts currently available use critical values from the exact distribution only for $N \geq 11$. Zar's table gives critical values for $N \geq 100$ but does not use the most accurate approximation procedure available. This paper provides a table of critical values based on the exact distribution for $3 \leq N \leq 18$ and very accurate critical values for 19 ...
