White (or yellow) phosphorus is the most common and most reactive of the 3 allotropic forms of phosphorus. Because of its reactivity, white phosphorus has been used as an incendiary agent by the military or as an igniter for munitions.

Background. Pre-hospital endotracheal intubation is frequently used for trauma patients in many emergency medical systems. Despite a wide range of publications in the field, it is

Pain is a problem that often has to be addressed in the prehospital setting. The delivery of analgesia may sometimes prove challenging due to problems establishing intravenous access or a harsh winter environment. To solve the problem of intravenous access, intranasal administration of drugs is used in some settings. In cases where vascular access was foreseen or proved hard to establish (one ...
