Brainwashing is the concept that the human mind can be altered or controlled by certain psychological techniques. Brainwashing is said to reduce its subjects' ability to think critically or independently, to allow the introduction of new, unwanted thoughts and ideas into their minds, as well as to change their attitudes, values and beliefs. The term "brainwashing" was first used in English by Edward Hunter in 1950 to describe how the Chinese government appeared to make people cooperate with them [Brainwashing: The Science of Thought Control: Amazon.co.uk ...](#)

[Brainwashing: The Science of Thought Control by Kathleen ...](#)

Brainwashing: The Science of Thought Control is an incredibly interesting book on brainwashing, social psychology, and neurology. Author Kathleen Taylor is a popular science author and a research scientist in the Department of Physiology, Anatomy and Genetics at the University of Oxford.

Brainwashing: The Science of Thought Control is a 2004 popular science book explaining mind control, which is also known as brainwashing, thought reform and coercive persuasion, by neuroscientist and physiologist Kathleen Taylor. It explains the neurological basis for reasoning and cognition in the brain, and proposes that the self is changeable while describing the physiology of neurological pathways. It reviews case studies including Patty Hearst, the Manson Family, and the mass murder/suicide

But until now, a crucial part of the debate has been missing: that of any serious reference to the science of the human brain. Descriptions of how opinions can be changed, whether by persuasion, deceit, or force, have been almost entirely psychological. In Brainwashing, Kathleen Taylor brings the worlds of neuroscience and social psychology together for the first time.
