"Building with cob, a step-by-step guide" by Adam Weismann & Katy Bryce gives you an in-depth look at many of the items

you need to consider when planning to build a cob home as well as the instructions on how to do it yourself. The book includes 13 chapters packed with information. Chapter 1 - Earth Building around the world

Learning How to Make and Build With Cob. A few months before we started on our cob building Henry - we went to a natural building workshop an hour from where we live. One of the things we learnt at this workshop was how to make cob. Cob really is not rocket science and with a little practice and experience - anybody can do it.

Cob house construction is an ancient building technique using lumps of earth mixed with sand, straw, and water. Cob structures can be used as homes, chicken coops, barns, and even smaller ones for ovens. Cob building is easy to learn, requires no special equipment, and uses sustainable materials.

Cob is a building material made out of earth, clay, sand, straw, and water that is pliable and can be hand-sculpted into buildings. Cob has been used and tested for thousands of years all over the world, and has proven to be a very viable building material.

### **How To Build a Cob House with Cob Construction**

"Cob" is the English term for "mud building." Cob was the primary method of home construction throughout England from the 13th Century until around 1800, when bricks became more economical. Among its many attributes, cob provides excellent insulating properties and durability.

In the seven years I've run The Year of Mud and written about building with cob, I realize I haven't written a simple 'how to mix cob' post. For many folks, particularly anyone coming across my various cob oven articles online, it may not actually be obvious how you mix cob, whether it's for an oven, bench, building a house, etc.

### **Cob House Building Services & Workshops - This Cob House**

Building a pizza oven can be broken down into 10 steps: 1. Build the base of the oven

to sit on. 2. Insulate the base of the oven. 3. Build a sand dome that will be the form your build your oven around. 4. Mix your thermal mass layer of cob (clay and sand) and build your oven around the sand form. 5.
