Building Wrap Dupont Usa Global DuPont™ Tyvek® HomeWrap® is the original house wrap, incorporating unique material science that helps keep air and water out, while letting water vapor escape. As a result, it can contribute to improved building durability by helping to protect homes against damaging wind and rain that can penetrate the exterior cladding.

Tyvek® HomeWrap® - DuPont Comparing weather barriers. A closer look. Micrograph views of perforated house wrap and Tyvek® HomeWrap® reveal stark differences. The ragged "microperforations" in perforated house wrap compromise its ability to resist air and water penetration, which can lead to potential mold, water damage and higher energy costs.

Perforated Wrap DuPont US DuPont™ Tyvek® CommercialWrap® building wrap is one of the easiest ways to make a significant difference in energy efficiency and overall building performance. Tyvek® CommercialWrap® can help in three vital areas, as part of a building envelope system: Controlling air leakage, which can impact the efficient operation

of HVAC systems, costing the commercial building sector billions each year.
