"This book explores the opportunities and challenges that both Europe and Asia face under the framework of the 21st Century Maritime Silk Road Initiative. The 21st Century Maritime Silk Road Initiative (MSR Initiative), put forward by the Chinese government together with the Silk Road Economic Belt, reflects China's ambition and vision to shape the global economic and political order. The first step and priority under the MSR Initiative, according to documents issued by China, is to build three 'Blue Economic Passages' linking China with the rest of the world at sea, two of which will connect China with Europe. This initiative, however, still faces enormous challenges of geopolitical suspicion and security risks. This book seeks to assess these risks and their causes for the cooperation between the Eurasian countries under the framework of MSR and puts forward suggestions to deal with these risks in the interdisciplinary perspectives of international relations and international law. Featuring a global team of contributors, this book will be of much interest to students of Asian politics, maritime security, international law and international relations"--

"Dimenticate tutti gli stereotipi sull'Africa. E leggete Congo!" Roberto Saviano Si parte dal gigantesco estuario del fiume Congo, come i colonizzatori, i missionari, i bianchi hanno sempre fatto. Un getto possente di detriti, terra, alberi che trasforma l'oceano in un brodo torbido per centinaia di chilometri: "Le immagini del satellite lo mostrano chiaramente: una macchia brunastra che, durante il picco della stagione dei monsoni, si estende verso ovest per ottocento chilometri. Quando ho visto per la prima volta delle fotografie aeree mi è venuta in mente una persona che si era tagliata i polsi e li teneva sotto l'acqua, ma per sempre. Così, quindi, comincia un paese: diluito in una grande quantità di acqua di oceano". E poi, attraverso centinaia di interviste con congolesi di tutte le età e le etnie, attraverso lo studio della storia, dell'archeologia, della geografia e della climatologia, attraverso una scrittura tersa e coinvolgente, si va alla scoperta di un paese, di un popolo, di un continente. Dai primi insediamenti preistorici agli orrori della dominazione coloniale belga, dall'indipendenza alle guerre civili, attraverso giungle e città, montagne di ghiacciai perenni e una natura ricchissima e incontaminata, un libro che davvero restituisce un mondo. Un fulminante bestseller in patria, tradotto nelle lingue maggiori, che ha vinto numerosi premi in tutto il mondo. Il più grande reportage africano dai tempi di Ryszard Kapuściński.

In his comprehensive overview of 17th century Italy, Professor Sella challenges the old view that Italy was in general decline, instead he shows it to have been a time of sharp contrasts and shifts in fortune. He starts with a balanced and critical analysis of political developments (placing the Italian states in their wider European context) before assessing the state of the economy. He then looks in depth at society, religion, and culture and science and in particular reassesses the influence of the Counter Reformation on Italian life. His book ends with an engrossing account of the life and work of Galileo as well as an overview of the important and often neglected contributions made by other scientists in the later part of the century. This rich and balanced volume is an ideal introduction to early modern Italy, and provides a critical reevaluation of a much misunderstood period in the country's history.

The role of French security policy and cooperation in Africa has long been recognized as a critically important factor in African politics and international relations. The newest form of security cooperation, a trend which merges security and development and which is actively promoted by other major Western powers, adds to our understanding of this broader trend in African relations with the industrialized North. This book investigates whether French involvement in Africa is really in the interest of Africans, or whether French intervention continues to deny African political freedom and to sustain their current social, economic and political conditions. It illustrates how policies portrayed as promoting stability and development can in fact be factors of instability and reproductive mechanisms of systems of dependency, domination and subordination. Providing complex ideas in a clear and pointed manner, France and the New Imperialism is a sophisticated understanding of critical security studies.

Cameroon is rich in petroleum, minerals, tropical forests, wildlife, water systems, fertile lands, and much more. Paradoxically however, most citizens live in abject poverty and without jobs, potable water, electricity, good healthcare and roads. This book is a thoughtful interrogation of some of the structural factors driving persistent poverty in Cameroon in the midst of natural resource abundance. It engages in a multidimensional critical analysis of the impact of natural resources on basic development indicators and concludes that good resource governance and sound management are the missing link. Natural resources alone will not create socio-economic prosperity void of good management with a clear development vision and strategy in Cameroon. The book assembles a wide diversity of analysis, views, perspectives and recommendations from economists, development experts, social and political scientists, on Cameroon's current development inertia. What emerges in the end is a coherent interdisciplinary analysis of the natural resource-development paradox as it plays out in an African setting. Theories and good practices from Africa and beyond are systematically applied to identify and critique present policy and management approaches while providing alternative options that can unlock Cameroon's natural resource wealth for national prosperity.

After decades of unsatisfying performances, economic growth took off in many sub-Saharan states at the beginning of the 21st century. More recently, however, the end of the commodity cycle - particularly with the oil price drop - and the rise of jihadist violence rocked the "Emerging Africa" boat. Is this the beginning of the end for sustained growth in the region? This Report investigates the economic impact of these new challenges upon Africa's frontier markets. It shows that the positive economic trajectory of recent years is being negatively affected, particularly for oil-exporting countries. However, while more caution is needed, Africa's growth prospects on the whole remain fairly good - at least for now. But there is an increasing need to understand the specific risks that individual countries face and the opportunities that they offer, as well as to re-assess the potential of each specific sector of economic activity. The three largest economies in the region - Nigeria, South Africa and Angola - are all under pressure. Others, including Ethiopia, Mozambique and Kenya, are still projected to achieve remarkable growth rates.

China has now taken Great Britain's place as Africa's third largest business partner. Where others only see chaos, the Chinese see opportunities. With no colonial past and no political preconditions, China is bringing investment and needed infrastructure to a continent that has been largely ignored by Western companies or nations. Traveling from Beijing to Khartoum, Algiers to Brazzaville, the authors tell the story of China's economic ventures in Africa. What they find is tantamount to a geopolitical earthquake: The possibility that China will help Africa direct its own fate and finally bring light to the so-called "dark continent," making it a force to be reckoned with internationally.

Jim O'Neill, one of the most influential economists today, shares his insights on how and why he developed one of the most compelling economic concepts of our time in The Growth Map. 'O'Neill has redefined how investors and Western business leaders see the world. This book tells the unlikely story of how O'Neill developed this path-breaking idea . . . lively, powerful and highly accessible' Gillian Tett, Financial Times Ten years ago, Jim O'Neill predicted that globalization would help Brazil, Russia, India and China (the BRICs) - busy, ambitious countries full of raw materials - overtake the largest Western economies. With all four BRIC nations set to do just that, no other idea has proved as significant for the new century. But these changes have provoked business and political uncertainty and in The Growth Map O'Neill examines what is coming next. Can the BRICs sustain their exceptional growth? Which nations will come next? And what, for all of us, does the future hold? 'Goldman Sachs' rock star' Business Week 'Sharp, shrewd. Tells the big story of our time. The fundamental shift of economic power from the West' Niall Ferguson 'O'Neill has changed how the world thinks about economic growth - and how the BRICs think about themselves' Lloyd Blankfein, Chairman And

This volume explains China's economic rise and liberalization and assesses how this growth is reshaping the structure and dynamics of global capitalism in the twenty-first century. China has historically been the center of Asian trade, economic, and financial networks, and its global influence continues to expand in the twenty-first century. In exploring the causes for and effects of China's re surging power, this volume takes a broad, long-term view that reaches well beyond economics for answers. Contributors explore the vast web of complex issues raised by China's ascendancy. The first three chapters discuss the global and historical origins of China's shift to a market economy and that transformation's impact on the international market system. Subsequent essays explore the ability of large Chinese manufacturers to counter the might of transnational retailers, the effect of China's rise on world income distribution and labor, and the consequences of a stronger China for its two most powerful neighbors, Russia and Japan. The concluding chapter questions whether China's growth is sustainable and if it will ultimately shift the center of global capitalism from the West to the East.

La complessità di una società è un arricchimento ma viene spesso vissuta come una minaccia. Da qui tante forme di discriminazione o esclusione. L'emigrazione Sud-Nord degli ultimi anni ha diffuso un'immagine impropria di un fenomeno che ha origini lontane. Scopo di questo volume è di presentare un inquadramento storico e globale, risalendo alle radici e studiando alcuni processi in cui la formazione della nazione ha dovuto confrontarsi con la presenza di comunità diverse per appartenen-

za geografica, culturale o religiosa ma anche per professione o ruolo sociale. In alcuni casi esse cercano l'integrazione nella nuova sede, in altre difendono la propria identità e vivono chiuse in se stesse. Come epicentro del volume c'è l'Asia sia come teatro di tante esperienze miste che come terra d'origine di minoranze che hanno cercato la fortuna o sono state trapiantate altrove, qui con una preferenza per l'Africa. Ebrei e armeni sono studiati anche per l'eccezionalità della loro epopea nel tempo e nello spazio. L'attualità ricompare attraverso l'importanza acquisita dalle rimesse degli emigrati verso le famiglie e i paesi natali, che hanno ormai soverchiato gli altri flussi finanziari compreso l'aiuto allo sviluppo.
