The integration of immigrants into a larger society begins at the local level. Turkish Berlin reveals how integration has been experienced by second-generation Turkish immigrant women in two neighborhoods in Berlin, Germany. While the neighborhoods are similar demographically, the lived experience of the residents is surprisingly different. Informed by first-person interviews with both public officials and immigrants, Annika Marlen Hinze makes clear that local integration policies—often created by officials who have little or no contact with immigrants—have significant effects on the assimilation of outsiders into a community and a society. Focusing on the Turkish neighborhoods of Kreuzberg and Neukölln, Hinze shows how a combination of local policy making and grassroots organizing have contributed to one neighborhood earning a reputation as a hip, multicultural success story and the other as a rougher neighborhood featuring problem schools and high rates of unemployment. Aided by her interviews, she describes how policy makers draw from their imaginations of urban space, immigrants, and integration to develop policies that do not always take social realities into consideration. She offers useful examples of how official policies can actually exacerbate the problems they are trying to help solve and demonstrates that a powerful history of grassroots organizing and resistance can have an equally strong impact on political outcomes. Employing spatial theory as a tool for understanding the complex processes of integration, Hinze asks two related questions: How do immigrants perceive themselves and their experiences in a new culture? And how are immigrants conceived of by politicians and policy makers? Although her research highlights the German-Türk experience in Berlin, her answers have implications that resonate far beyond the city's limits.

Before the interstates, Main Street America was the small town's commercial spine and served as the linchpin for community social solidarity. Yet, during the past three decades, a series of economic downturns has left many of the great small cities barely viable. *American Hometown Renewal* is the first book to combine administrative, budgetary, and economic analysis to examine the economic and fiscal plight currently facing America's small towns. Featuring a blend of theory, applications, and case studies, it provides a comprehensive, single-source textbook covering the key issues facing small town officials in today's uncertain economy. Written by a former public manager, university professor, and consultant to numerous small towns in the Heartland, this book demonstrates the ways in which contemporary small towns throughout the nation are facing economic challenges brought about by the financial shocks that began in 2008. Each chapter explores a theme related to small town revival and provides a related tool or technique to enable small town officials to meet the challenges of the 21st Century. Encouraging local small town officials to look at the economic orbit of communities in a similar manner as a town's budget or a family's personal wealth, examining its specific competitive advantages in terms of relative assets to those of competing communities, this book provides the reader with step-by-step instructions on how to conduct an asset inventory and apply key asset tools to devise a strategy for overcoming the challenges and constraints imposed upon spatially-fixed communities. *American Hometown Renewal* is an essential primer for students studying city management, economic community development, and city planning, and will be a trusted handbook for city managers, geographers, city planners, urban or rural sociologists, political scientists, and regional microeconomists.

The historic election of Barack Obama, the first African-American president is analyzed from the perspective of racial relations. To trace the effect of time, Liu links Obama's multiracial winning coalition to the two-party system and the profound impact of racial changes since 1965.

Sport is seen as an increasingly important aspect of urban and regional planning. Related programmes have moved to the forefront of agendas for cities of the present and future. This has occurred as the barriers between so-called 'high' and 'popular' culture continue to disintegrate. Sport is now a key component within strategies for the cultural regeneration of cities and regions, a tendency with mixed outcomes - at times fostering genuinely democratic arrangements, at others pseudo-democratic arrangements, whereby political, business and cultural elites manipulate a sense of sameness and unity among their fellow citizens to smoothen the path for the pursuit of what are actually vested interests. Almost any active enactment of a 'sports city of culture' risks divisiveness. Recognizing controversies, with both potentially positive and negative outcomes, this book examines sport within contexts of urban and regional regeneration, via a number of rather different case studies. Within these studies, the role of sport stadium development, franchise expansion and sports-fan (and anti-sport) activism is addressed and articulated with issues concerning, inter alia, public funding, environmental impact, urban infrastructure and citizen identity. The 'sport in the city' project commenced as a research symposium held at the University of Otago, Dunedin, New Zealand and number of the essays originate from this occasion. This book was previously published as a special issue of *Sport in Society*.

There is a clear discrepancy between the ideal role of political parties expressed in many textbooks and the reality that we see playing out in politics. This book gives us a big picture analysis that helps explain what is happening in American electoral politics.

Donald Judd Interviews presents sixty interviews with the artist over the course of four decades, and is the first compilation of its kind. It is the companion volume to the critically acclaimed and best-selling *Donald Judd Writings*. This collection of interviews engages a diverse range of topics, from phi-

losophy and politics to Judd's insightful critiques of his own work and the work of others such as Mark di Suvero, Edward Hopper, Yayoi Kusama, Barnett Newman, and Jackson Pollock. The opening discussion of the volume between Judd, Dan Flavin, and Frank Stella provides the foundation for many of the succeeding conversations, focusing on the nature and material conditions of the new art developing in the 1960s. The publication also gathers a substantial body of unpublished material across a range of mediums including extensive interviews with art historians Lucy R. Lippard and Barbara Rose. Judd's contributions in interviews, panels, and extemporaneous conversations are marked by his forthright manner and rigorous thinking, whether in dialogue with art critics, art historians, or his contemporaries. In one of the last interviews, he observed, "Generally expensive art is in expensive, chic circumstances; it's a falsification. The society is basically not interested in art. And most people who are artists do that because they like the work; they like to do that [make art]. Art has an integrity of its own and a purpose of its own, and it's not to serve the society. That's been tried now, in the Soviet Union and lots of places, and it doesn't work. The only role I can think of, in a very general way, for the artist is that they tend to shake up the society a little bit just by their existence, in which case it helps undermine the general political stagnation and, perhaps by providing a little freedom, supports science, which requires freedom. If the artist isn't free, you won't have any art." *Donald Judd Interviews* is co-published by Judd Foundation and David Zwirner Books. The interviews expand upon the artist's thinking present in *Donald Judd Writings* (Judd Foundation/David Zwirner Books, 2016).

Uncovers the politics involved when a city recruits and implements a presidential convention. Political party conventions have lost much of their original political nature, serving now primarily as elaborate infomercials while ratifying the decisions made by voters in state primaries and caucuses. While this activity hasn't changed significantly since the 1970s, conventions themselves have changed significantly in terms of how they are recruited, implemented, and paid for. *American Cities and the Politics of Party Conventions* analyzes how and why cities advance through the site selection process. Just as parties use conventions to communicate their policies, unity, and competence to the electorate, cities use the convention selection process to communicate their merits to political parties, businesses and residents. While hosting such a "mega-event" provides some direct economic stimulus for host cities, the major benefit of the convention is the opportunity it provides for branding and signaling status. Combining a case studies approach as well as interviews with party and local officials, Eric S. Heberlig, Suzanne M. Leland, and David Swindell bring party convention scholarship up to date while highlighting the costs and benefits of hosting such events for tourism bureaus, city administrators, elected officials, and the citizens they represent.

City governments are rapidly becoming society's problem solvers. As Sara Hughes shows, nowhere is this more evident than in New York City, Los Angeles, and Toronto, where the cities' governments are taking on the challenge of addressing climate change. *Repowering Cities* focuses on the specific issue of reducing urban greenhouse gas (GHG) emissions, and develops a new framework for distinguishing analytically and empirically the policy agendas city governments develop for reducing GHG emissions, the governing strategies they use to implement these agendas, and the direct and catalytic means by which they contribute to climate change mitigation. Hughes uses her framework to assess the successes and failures experienced in New York City, Los Angeles, and Toronto as those agenda-setting cities have addressed climate change. She then identifies strategies for moving from incremental to transformative change by pinpointing governing strategies able to mobilize the needed resources and actors, build participatory institutions, create capacity for climate-smart governance, and broaden coalitions for urban climate change policy.

Community economic development (CED) is an increasingly essential factor in the revitalization of low- to moderate-income communities. This cutting-edge text explores the intersection of CED and social work practice, which both focus on the well-being of indigent communities and the empowerment of individuals and the communities in which they live. This unique textbook emphasizes a holistic approach to community building that combines business and real-estate development with a focus on stimulating family self-reliance and community empowerment. The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics. The authors delve deep into the social, political, human, and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes. Throughout, they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED's next phase.

What is causing the American public to move more openly into all-right terrain? What explains the uptick in anti-immigrant hysteria, isolationism, and an increasing willingness to support alternatives to democratic governance? *The Everyday Crusade* provides an answer. The book points to American Religious Exceptionalism (ARE), a widely held religious nationalist ideology steeped in myth about the nation's original purpose. The book opens with a comprehensive synthesis of research on nationalism and religion in American public opinion. Making use of survey data spanning three different presidential administrations, it then develops a new theory of why Americans form extremist attitudes, based on religious exceptionalism myths. The book closes with an examination of what's next for an American public that confronts new global issues, alongside existing challenges to perceived cultural authority. Timely and enlightening, *The Everyday Crusade* offers a critical touchstone for better understanding American national identity and the exclusionary ideologies that have plagued the nation since its inception.

This book presents pioneering work on a range of innovative practices, experiments, and ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarships identifying the emergence of new urban actors, spaces and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world, and leverage the insights they provide for both theory and practice. Cities – both as political and material entities – are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy, planning, and governance responses to climate change are fraught with tension and contradictions. While on one hand local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably enmeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance. Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment

Report (AR6) and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa "Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are." Christopher Gore, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada "This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South." Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom "This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world – from California to Canada, India to Indonesia."

Urban Politics blends the most insightful classic and current political science and related literature with current issues in urban affairs. The book's integrative theme is 'power,' demonstrating that the study of urban politics requires an analyst to look beyond the formal institutions and procedures of local government. The book also develops important subthemes: the impact of globalization; the dominance of economic development over competing local policy concerns; the continuing importance of race in the urban arena; local government activism versus the 'limits' imposed on local action by the American constitutional system and economic competition; and the impact of national and state government action on cities. *Urban Politics* engages students with pragmatic case studies and boxed material that use classic and current urban films and TV shows to illustrate particular aspects of urban politics. The book's substantial concluding discussion of local policies for environmental sustainability and green cities also appeals to today's students. Each chapter has been thoroughly rewritten to clearly relate the content to current events and academic literature, including the following: the importance of the intergovernmental city the role of local governments as active policy actors and vital policy makers even in areas outside traditional municipal policy concerns the prospects for urban policy and change in and beyond the Trump administration, including the ways in which urban politics is affected by, but not determined by, Washington. Mixing classic theory and research on urban politics with the most recent developments and data in urban and metropolitan affairs, *Urban Politics, 10e* is an ideal introductory textbook for students of metropolitan and regional politics and policy. The book's material on citizen participation, urban bureaucracy, policy analysis, and intergovernmental relations also makes the volume an appropriate choice for Urban Administration courses.

'Tourism in the Middle East' embodies a multi-discursive approach to the study of tourism in the region, offering not only different perspectives but qualifying local knowledge and realities.

The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, *Introduction to Cities* examines the study of cities through two central concepts: that cities are places, where people live, form communities, and establish their own identities, and that they are spaces, such as the inner city and the suburb, that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments. The authors offer a balanced account of life in cities and explore both positive and negative themes. In addition, the text takes a global approach, with examples ranging from Berlin and Chicago to Shanghai and Mumbai. The book is extensively illustrated with updated maps, charts, tables, and photographs. This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces, exploring power and politics in an urban context. It contains; information on the status of poor and marginalized groups and the impact of neoliberal policies; material on gender and sexuali-

ty; and presents a greater range of geographies with more attention to European, Latin American, and African cities. Revised and updated, *Introduction to Cities* provides a complete introduction to the history, evolution, and future of our modern cities.

Praised for the clarity of its writing, careful research, and distinctive theme - that urban politics in the United States has evolved as a dynamic interaction among governmental power, private actors, and a politics of identity - *City Politics* remains a classic study of urban politics.

Interest and research on regionalism has soared in the last decade. Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs. Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance. *Governing Metropolitan Areas* describes and analyzes structure to understand the how and why of regionalism in our global age. The book covers governmental institutions and their evolution to governance, but with a continual focus on institutions. David Hamilton provides the necessary comprehensive, in-depth description and analysis of how metropolitan areas and governments within metropolitan areas developed, efforts to restructure and combine local governments, and governance within the polycentric urban region. This second edition is a major revision to update the scholarship and current thinking on regional governance. While the text still provides background on the historical development and growth of urban areas and governments' efforts to accommodate the growth of metropolitan areas, this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions. There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance.
