Free Fashion Design Software - CAD Drafting and Blueprint ...

Definition: Fashion CADs, (Computer Aided Designs) are computer rendered flat fashion sketches (technical drawings) filled with colors and fabric patterns, and arranged on a fashion presentation board or fashion portfolio layout to show how a finished garment will look, or to get a clear picture of a fashion design collection theme.

CAD stands for computer-aided design. The uses for CAD software are almost endless: to create blueprints for a building, to design a machine, or to create layouts for a fashion piece. CAD is most often used in the drafting of architecture and contracting, or technical designing by engineers.

In the fast-moving world of the fashion industry, with seasonal trends and consumer demands to contend with, the ability to use CAD to modify and create garments gives designers an edge. CAD also enables designers to tailor and customize existing styles, and produce new clothing to meet customer needs and desires.
