2LVJWM - DONNA SAGE

Step 1, Set the parking brake and disconnect the negative cable from your car battery. Be sure to do this to avoid short-circuiting the electrical system during the installation, which could lead to fire or physical harm for you.[1] X Research source For instructions on disconnecting the battery, see How to Disconnect a Car Battery.Step 2, Unscrew any screws that are securing the trim in place. Be careful to remove all screws before trying to pry off the trim or you may break it.[2] X ...

Step 1, Look at the stereo system you are installing your new speakers on. Some systems are simple stereo audio systems that have limited wattage and two or four channels, so 100 watt speakers, or adding 8 or more just won't make sense. Trying to push too many speakers can, in fact, cause the quality of the audio to be diminished, or even damage the stereo.Step 2, Check the dimensions of the existing speakers so minimum modifications will be needed to fit the new ones in. Speakers come in ...

The Basic SQ Car Audio Setup. 1. Head Unit. As we mentioned in our previous car audio section, the head unit is an important equipment that you need to upgrade as the top priority because the HU/head unit is similar to the vocal of a singer, so upgrade this first. 2.

It is essential to understand the color code for car stereo wires if you are planning to install an aftermarket car stereo at home. If you mess up with the wires, it can lead to short circuit resulting in damaging the entire circuit. Carefully read the whole article and then also check with the instruction manual that came with the new car stereo.

How to Install a Car Stereo (with Pictures) – wikiHow

Our Classic 200, Classic 200B, Vintage 100, hidden bluetooth amplifier and all loudspeakers now include a 2 year guarantee! This diagram shows the layout of a common car audio system and signal flow. The dotted black line shows the path of the preamp audio signal (before it's amplified), from a head unit, through an equalizer and electronic crossover and to the amplifier. A video signal is also sent from the head unit to a pair of video screens in the back seat area. From the amplifier, an amplified audio signal (the solid black line) goes to each speaker in the system — one amplifier powers a subwoofer.
