Solution of Management Information System in Restaurant Case

Study: 1. A management information system (MIS) is an organized combination of people, hardware, communication networks and data sources that collects, transforms and distributes information in an organization.

Management Information System in Restaurant Case Study

The case study method is two-parted. One part is the case itself, and other part is the discussion of the case. Case studies are chosen for teaching based on how rich the narrative is, and whether the people in the study are required to make a decision or solve a problem. When using case studies, the focus is not on the data or the analysis.

What Exactly is a Case Study? | UniversalClass

A case study is a special type of thought leadership content that tells a story. Case studies are narratives that feature real world situations or uses of products or services to demonstrate their value. A well written case study will follow a customer as they define a problem, determine a solution, implement it, and reap the benefits.
