Researchers describe how case studies examine complex phenomena in the natural setting to increase understanding of them.3 4 Indeed, Sandelowski5 suggests using case studies in research means that the holistic nature of nursing care can be addressed. Furthermore, when describing the steps undertaken while using a case study approach, this method of research allows the researcher to take a complex and broad topic, or phenomenon, and narrow it down into a manageable research question(s).

ANSWER: For relieving Carol's symptoms the basic nursing strategies should ensure that the toiletry area should properly cleaned using diluted bleach, she must wash her hand after using the toilet, her clothes must be washed in warm water, and lastly the nurse should suggest her the BRAT food i.e. Banana Rice Applesauce and Toast as the main food from time to time and drink as much liquid as she discharges in her stools (Yarbro, 2005).

#### Case Study Of Nursing Management Of Mr Singh Nursing Essay

Nursing Care Plan (case study) Topic: Nursing Care Plan (case study) Order Description. Case Study: Mario is a 74 year old male that has been admitted to hospital (for an unrelated illness) however he has cracked and sore heels and his wife 'Angela' insists that you rub olive oil on his feet that she has bought in from home in an unmarked bottle. However as you are a student nurse all you can do is advised the registered nurse in charge of Mario.

A case study, in general, is detailed research about the subject such as a person, a group of people or a unit, and its affecting factors. A case study in the nursing field does not really have a big differ-

ence. You can use it to study your patients as part of your daily practice in your practicum phase. Through this study, you can apply the lessons that you have learned in the classroom to an actual experience that you can use as leverage when applying for a job in the future.

A nursing case study is a detailed study of an individual patient. Through this type of research, you can gain more information about the symptoms and the medical history of a patient. It will also allow you to provide the proper diagnoses of the patient's illness based on the symptoms he or she experienced and other affecting factors.

#### Case study: care in nursing homes - FutureLearn

The Nursing and Midwifery Council state in the code of standards of conduct, performance and ethics for nurses and midwives (NMC, 2008a) that it is essential to 'make the care of people your first concern, treating them as individuals and respecting their dignity' and this is an important consideration when writing an essay based on a case study.

#### Case Study on Palliative Care: Example Answers

The case studies here demonstrate some positive examples of the NHS delivering improved high quality care in a number of different settings across the country. They provide some context and background to the challenges being faced by the NHS and the solutions developed to ensure

better, cost effective outcomes for patients and the public.

The first portion of the case study paper will talk about the patient — who they are, why they are being included in the study, their demographic data (i.e., age, race), the reason (s) they sought medical attention and the subsequent diagnosis. It will also discuss the role that nursing plays in the care of this patient.

#### NHS England » Case studies

A nursing case study is an in-depth analysis and subsequent description of a patient or a number of them suffering from a particular disease or condition for promotion of detailed understanding about their circumstances. It may also cover a detailed analysis of one person or group as a model for medical and healthcare phenomena.

This assignment will present a nursing care study of a patient on a cardiac ward. The patient will be referred to as Ann to maintain confidentiality (NMC, 2008). Ann's consent was gained prior to starting this care study. The care study will be developed using the Nursing process and the Roper, Logan and Tierney model. These will both be outlined.

Other studies such as CONSENSU34, and SOLVD35 were also found that ACE inhibitors are beneficial in the treatment of heart failure. CONSENSUS trial reported a significant reduction in term of the mortality rate during the 6-month follow up (44% vs 26%) in NYHA class IV patients while SOLVD also shown an improvement in the survival rate in the active treatment group with the absolute risk ...
