## IX0239 - ALLEN ADRIENNE

---

Robin Cook often comes up with interesting concepts in the medical field, as he did for this one. I probably will try another one from him sometime. I ADORE George Guidall in the Longmire series but just didn't feel that his delivery suited the main character.

"Robin Cook has been entertaining medical thriller fans for decades, but he does much more with his latest novel, Cell...a thought-provoking story."—Associated Press "Cook, ever the master of the medical thriller, combines controversial biomedical research issues with critical ethical concerns and gripping suspense. Dr. Robin Cook is the author of thirty previous books, most recently Nano, and is credited with popularizing the medical thriller with his wildly successful first novel, Coma. He divides his time between Boston and Florida. His most recent best-sellers include Death Benefit, Cure, and Intervention.

### **Cell by Robin Cook - Goodreads**

"Rare is the writer who can take us into the fast-paced, miraculous, often bewildering world of modern medicine the way Robin Cook can. CELL is a superbly crafted, full-steam thriller, to be sure, but also a vivid lesson in just how momentous are the advances being made in medicine almost by the day—and how highly unsettling are some of the possible consequences."

**Cell (Audiobook) by Robin Cook | Audible.com**

Robin Cook has used a fresh and easily understandable concept and turned *Cell* it into a great plot. The theme isn't too unbelievable either. With the advancement in mobile technology and development of apps for even the minutest of jobs, it is not too far in time that we may actually see an iDoc in the market.
